

Designed for People, Built on Trust,
Connecting the World.

redt
Laser & CNC Experts Group

About **Redt Inc.**

Founded in 2005,

Redt Inc. is a global leader in developing innovative CNC and laser marking solutions.

Based on over 20 years of expertise, our company specializes in crafting cutting-edge hardware, intuitive software, and in-house manufacturing, ensuring seamless optimization for diverse applications.

Our integrated approach allows us to deliver reliable, high-performing products at competitive prices, offering unique and effective solutions tailored to the needs of markets such as jewellery, leather, key duplication, and signage.

Comprehensive In-House Capabilities

At Redt Inc., we believe in delivering excellence from concept to completion.

Our in-house team handles every step of the process, including design, production, and software development.

This streamlined operation not only enhances the quality and performance of our solutions but also ensures cost-effectiveness for our clients worldwide.

📍 13-10, Techno 2-ro, Yuseong-gu, Daejeon, Republic of KOREA

Why do partners choose Redt Inc.?

Global Expertise

Trusted by partners in over 40 countries, delivering innovation and reliability across industries worldwide.

Innovative Technology

Continuously improving solutions to address evolving market demands with precision and efficiency.

Competitive Advantage

Leveraging in-house manufacturing expertise and seamless software integration to provide fully optimized solutions customized to diverse industry needs.

Redt Inc. is pleased to showcase its latest solutions of ou company.

We value the opportunity to introduce our innovative products to you and look forward to discussing potential collaborations. For further information, please visit www.iredt.com or contact us directly.

EXCELLENCE IN EVERY ENGRAVING

Our technology starts with understanding people.
For People, By People – Designed with care, built on trust,
and strengthened through lasting collaborations worldwide.

Hybrid CNC Engraving & Laser Marking
in One System

MAGIC™-JANUS

JANUS delivers unlimited creative freedom through a dual-engine CNC + laser system, providing total control with MagicEngrave™ software while achieving true cost efficiency by integrating two professional technologies into a single machine.

Specification

General	Dimensions	550mm(W) x 530mm(H) x 600mm(D)
	Weight	70kg
	Power	30W <500W / 60W <600W
	Power Supply	100V~240V, 50Hz/60Hz
	Temperature	0°C~40°C
	Humidity	10%-85%
CNC	Rotary Working Range	Outer Ø14-65 mm / Inner Ø11-55 mm
	Working Stroke	240mm(X) x 120mm(Y) x 60mm(Z)
	Tool Diameter	Ø4 mm
	DC Motor Output	37.9W
LASER	Working Area	120mm(X) x 100mm(Y) x 60mm(Z)
	Laser Type	30W / 60W Fiber MOPA Laser
	Effective Laser Marking Speed	up to 1000 m/s
	Laser Working Area	110mm(X) x 110mm(Y)
	Effective Z Working Range	30W up to 73 mm / 60W up to 40 mm
	Cooling System	Air Cooling

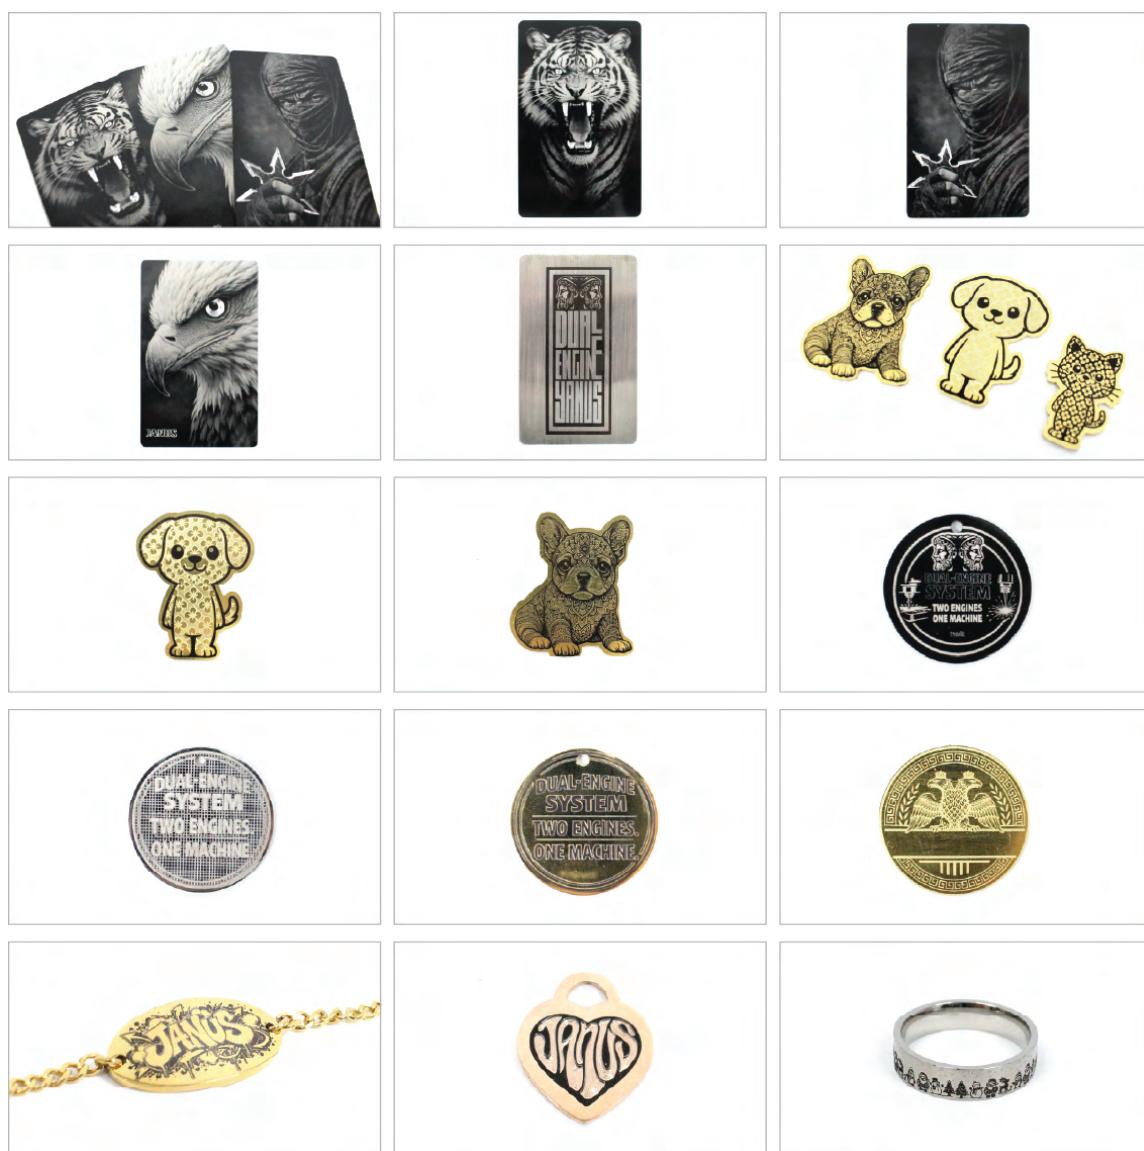

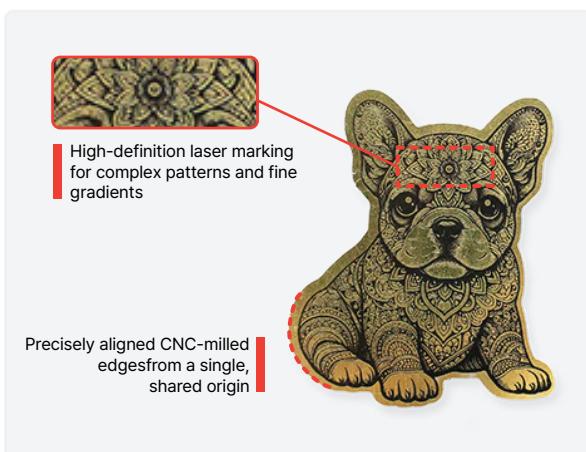

Unlimited Creative Freedom

MagicEngrave™ - One Software, Total Control

True Cost Efficiency

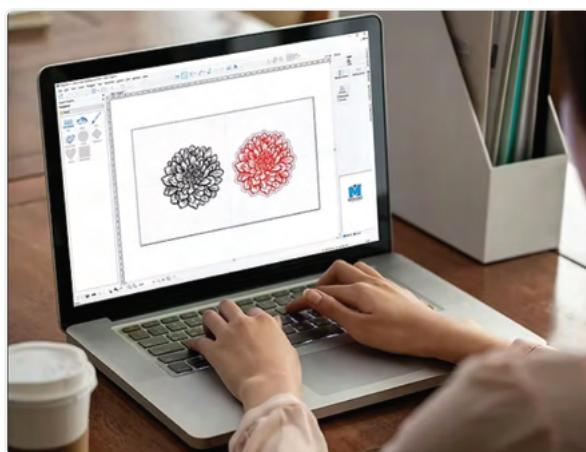

- Supports CNC scribing and endmill machining
- Supports laser marking and laser cutting
- Ring outer & inner engraving supported (Inner diameter engraving with manual angle adjustment)
- Pen engraving supported
- Compatible with pendant clamp, anti-curling clamp, tailstock, and CNC cutting clamp
- Auto positioning via built-in camera
- Auto focus via probe-based system
- Multipurpose Detachable Clamp System

Unlimited Creative Freedom

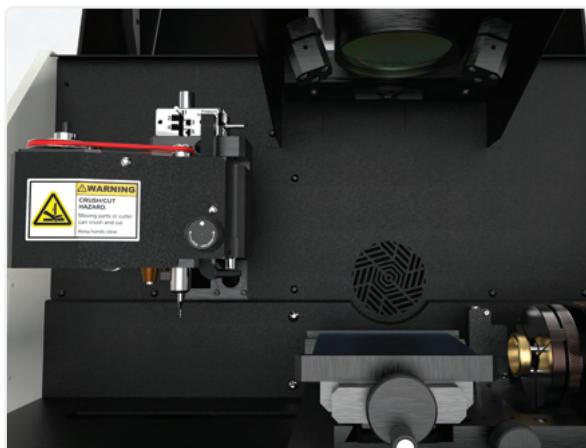

Use CNC engraving and laser marking in a single machine. Without being restricted by a single workflow, you can freely create a wide range of jewelry designs with greater flexibility and creativity.

MagicEngrave™ - One Software, Total Control

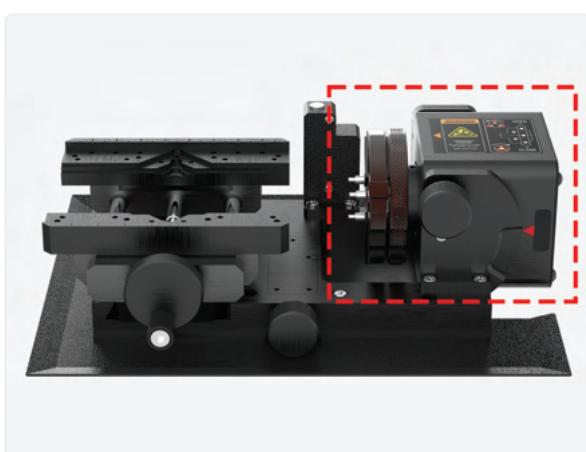

A dedicated software developed specifically for jewelry applications. Easily operate both CNC and laser processes from one unified screen for intuitive and efficient control.

Less setup. Faster production. An easy-to-use workspace that lets you control both CNC and laser operations from one interface, streamlining tool setup and toolpath generation.

True Cost Efficiency

No need to purchase CNC and laser machines separately. With one system, you can reduce both equipment investment and workspace requirements at the same time.

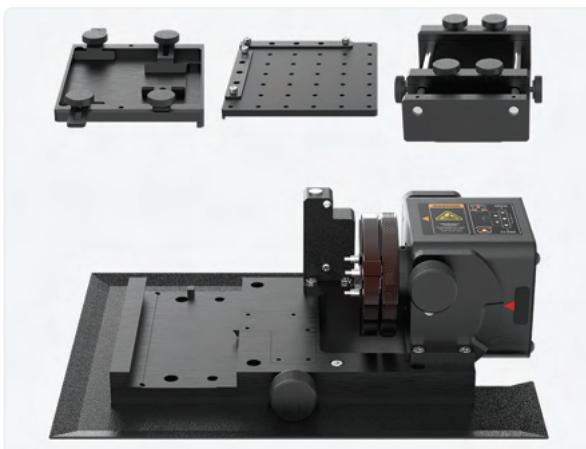

Built-in Rotary System

A fully integrated rotary engraving and machining system comes standard with the machine, eliminating the need for additional options or external attachments.

Enables inner and outer diameter engraving on cylindrical objects such as rings, bangles, pens, and mugs, as well as flat materials.

Features a rotary tilting structure optimized for laser inner-diameter marking, significantly expanding application versatility.

Multipurpose Detachable Clamp System

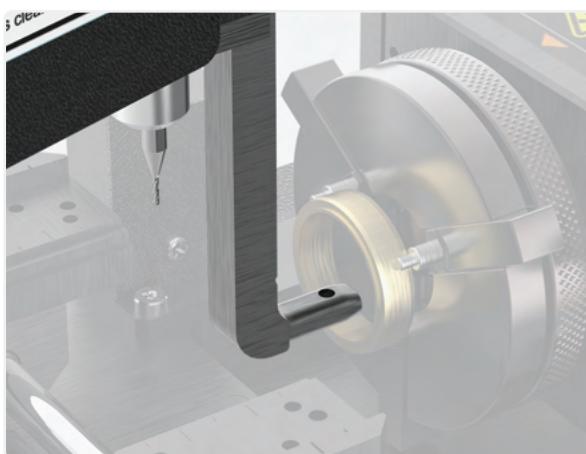

Multiple clamps can be easily attached and detached, allowing users to select the optimal fixture based on material size and shape. It maximizes efficiency and stability across a wide range of engraving and marking applications.

Cutting & Scribing Dual-Purpose Spindle

The head integrates a DC motor and spindle, enabling high-speed rotation of cutting tools such as V-cutters and end mills, while also supporting non-rotational scribing for precision marking.

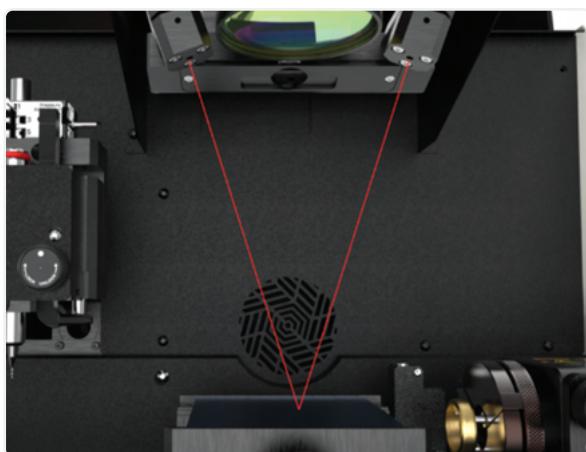

A built-in Z-axis movement control mechanism within the spindle head allows the Z-axis to be locked for cutting operations or released for scribing, enabling quick and intuitive tool selection based on the application.

Built-in L-Tool for Ring & Bangle Inner Engraving

A dedicated L-shaped Z tool is integrated into the head for inner engraving of rings and bangles.

Inner-diameter engraving can be performed immediately without changing tools, improving workflow speed and reducing setup time.

Focus Pointer System

Due to the invisible nature of laser beams, accurate focusing to a precise point is critical for efficient marking and engraving, particularly for controlled results such as black and white marking.

Two focus guide laser pointers indicate the optimal focal point, and the Z-axis is electronically controlled to align with this position, ensuring energy efficiency and consistent marking quality.

MOPA Fiber Laser Marking Machine

MAGIC™-L3

MAGIC™-L3 has a variety of automatic functions and features that enable anyone to operate the machine with simplicity and ease. Its revolutionary functions ensure high-precision, high-quality, and high-speed marking with a polished and shiny finish on any jewelry products. MOPA laser source is high performing, with a power output that ranges from 30W to 100W that allow the use the machine for color marking, high-power cutting and other various marking and cutting operations for items with different heights.

Specification

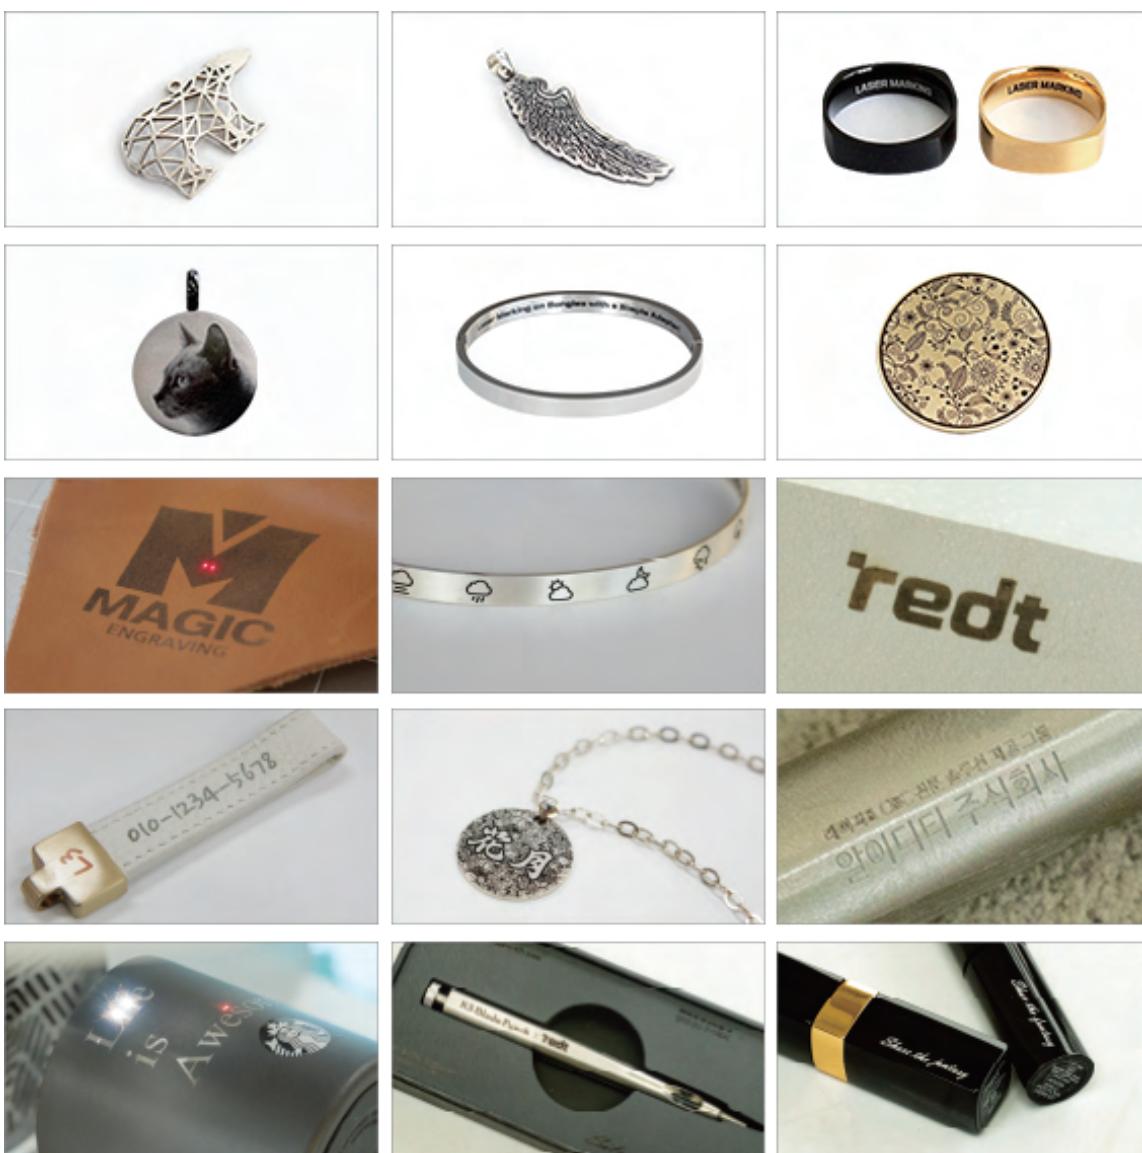

Models	L3-30W	L3-60W	L3-1000W
Laser Class	Class 1 Laser Product		
Focus Laser Class	Class 2 Laser Product, <1mW		
Dimensions	404mm(W) x 556mm(H) x 590mm(D)		
Marking Area	112mm x 112mm		
Max Material Height	100mm		
Z Stroke	100mm (Motorized)		
Chamber Size	350mm(W) x 100mm(H) x 170mm(D)		
Safety Door Open Height	266mm (From base plate)		
Max Material Weight	20kg		
Weight	46kg	50kg	54kg
Power Supply	100V~240V, 50Hz/60Hz		
Power Consumption	340W	520W	730W
Cooling	Air Cooling		
Temperature	0°C~40°C		
Humidity	10%-85%		

video

Black & white marking, photo engraving, deep marking, cutting, and cleaning – all in one solution.

- Easy mode switching with a wireless docking station.
- Built-in rotary clamp structure allows pendant marking without removing the clamp.
- Load-N-Go system automatically detects the rotary clamp.
- Camera positioning enables design placement directly on the material image.
- Mixed toolpaths allow seamless processing of complex shapes.
- Auto tilting automatically adjusts angles when marking the inner/outer side of rings.
- Auto focusing automatically sets the correct laser focus.
- Various vices for complex-shaped objects simplify the marking process.
- Powerful cutting and deep marking using high-output laser beam.
- User- and space-friendly design.
- Ultra-compact structure fits in tight spaces.
- Adaptive Cooling System activates fans only when needed for silent or low-noise operation.
- Clean Back design conceals power cords, USB cables, and exhaust pipes.
- Direct power control of external devices. (air pump, dust collector)
- Job time estimation feature for long processing tasks.

Load-N-Go system

Equipped with two 14,500 RPM spindle motors.

Equipped with two cutters and automatically changes tools.

Tool lifespan is extended with automatic tool changing system.

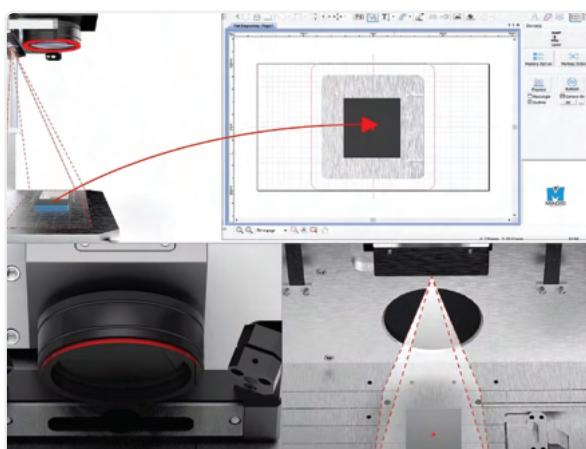

The One and Only Solution in the market, Bangle Rotary Clamp

Optimized for detailed and high-quality bangle markings.

Perfectly fits BestBuilt-L3 for enhanced usability.

Enables inner and outer diameter marking on various bangle styles.

Simple setup and intuitive operation streamline the marking process.

Easy Positioning via Built-in Camera

Easy Positioning of Engraving Design/Image.

Easy Engraving for Complex Materials.

3-Axis Focus Pointers

MAGIC™-L3 offers auto-focus feature for easy and precise focus on the material to be engraved and/cut.

3-Axis focus pointer enables you to use the quide laser beam shot directly down on the material for focusing on any type of material.

Smart & Safe Laser Marking Machine

Class 1 Laser Product.

Safe Chamber Type.

Vision Protection Viewing Window.

Automated Dust collector's vacuum intakes the dust and fumes more efficiently thanks to its internal air flowing structure.

Various Automatic Features

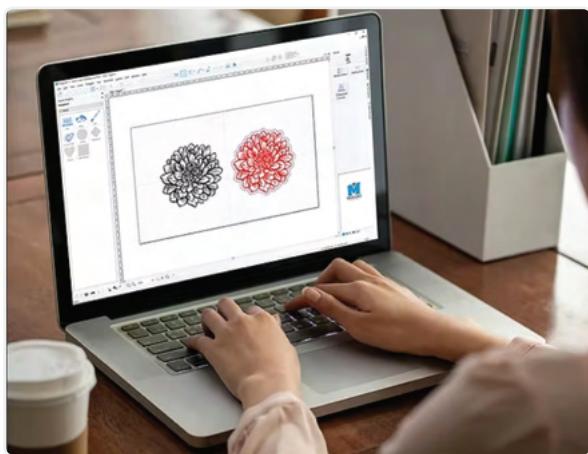

Automatic Positioning of the Scan Head.

Automatic Safety Door.

Automatic On/Off Switching of Dust Collector.

Machine Status-Indicating Lights.

Adaptive Cooling System for Quiet Operations.

Easy-to-Use Software – MagicEngrave™

Easy and Fast CAD/CAM Software.

Easy Selection of Designs.

Easy to Learn, Easy to Use Software.

Compatible with Various Other Programs.

Compact Fiber Laser Marking Machine

MAGIC™-L2

MAGIC™-L2 is a laser marking machine developed based on the L100 laser marking machine that has been used for a long time in the jewelry industry. The new model MAGIC™-L2 can safely, conveniently, and quickly perform marking work that is more delicate and complex, and help with a variety of shapes, unlike general industrial marking.

Specification

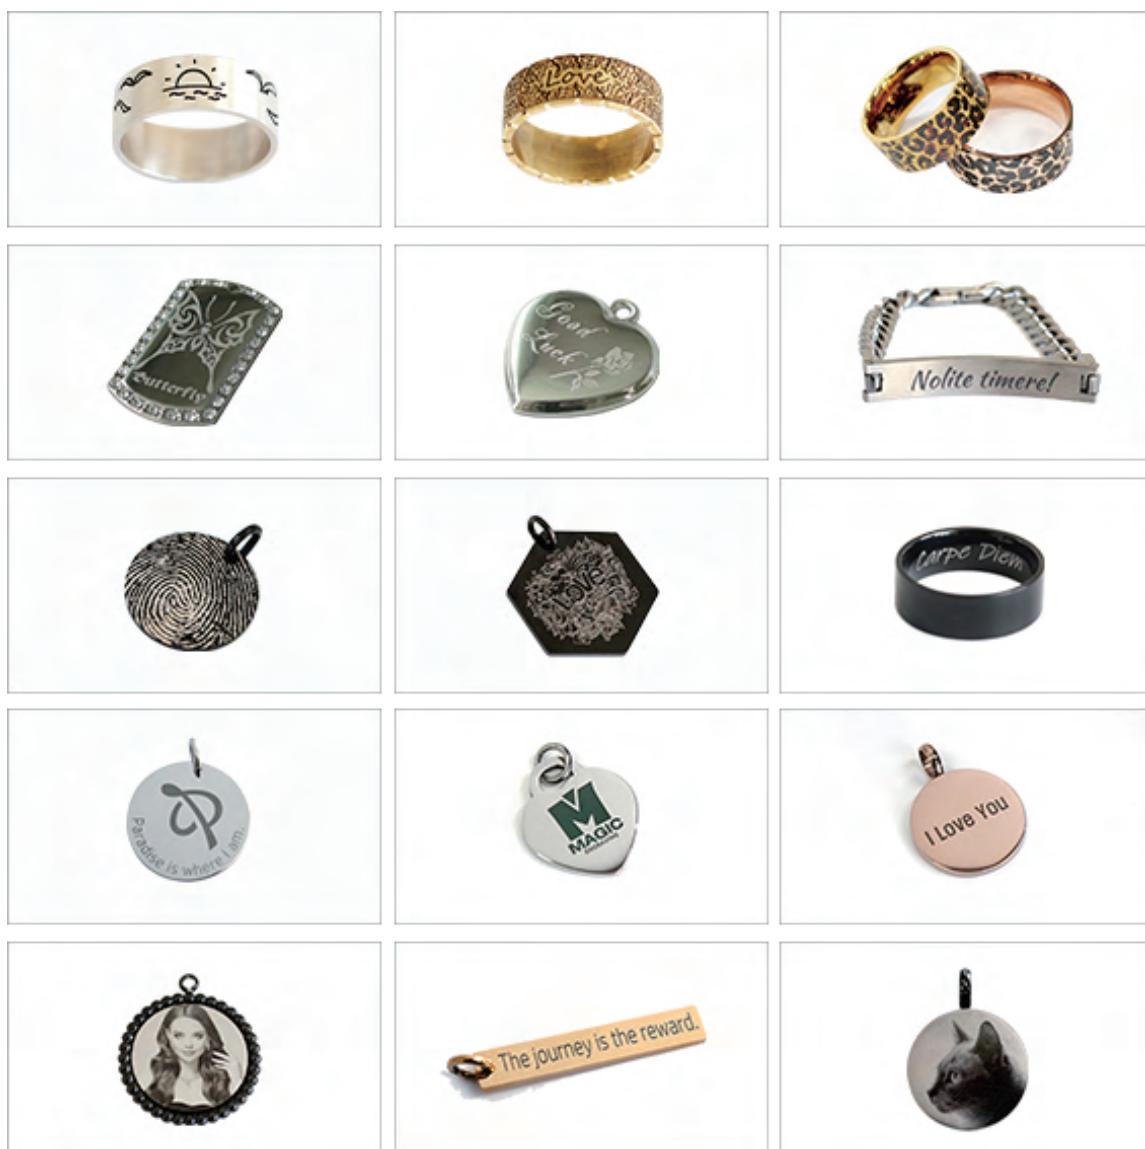

Laser Class	Class 1 Laser Product
Laser Source Type	MOPA Fiber Laser
Dimensions	304mm(W) x 554mm(D) x 500mm(H)
Marking Area	85mm(X) x 85mm(Y) X 62mm(Z)
Max Material Height	62mm
Speed Range	4000mm/s
External Power supply	AC 220V/2A
Average Output Power	30W
Wave Length	1064 nm
Weight	36kg
Power Supply	AC 100V~240V, 50/60Hz
Power Consumption	340W
Cooling	Air Cooling
Temperature	0°C~40°C
Humidity	10%-85%

video

Supports black/white marking, photo marking, deep marking, and cleaning on various metal items such as pendants, bracelets, and rings.

- Easy pendant↔ring marking mode switching with push-pull connector.
- Left and right sliding rotary structure for easy marking of the outer/inner diameter of the ring.
- Batch work on complex shape creation with blend toolpaths.
- Built-in flat plate height automatic control axis.
- Auto-focusing that automatically adjusts the laser focus.
- Provides a variety of vice to easily mark products with complex shapes.
- User-friendly design.
- Can be used in a narrow installation space due to its ultra-compact structure.
- Adaptive cooling system that operates the cooling fan only when necessary Silent or quiet operation.
- Automatic dust collector ON/OFF function provided as standard.
- Soft hinge that operates the safety door smoothly with little force built-in.
- Upward open safety door provides a sense of openness and provides ample operating space for equipment.

Optimized for jewelry

Extensive Pulse Control that Enables Perfect Black and White Marking.

Multi-Toolpath System Perfect for Complicated Operations.

Easy marking mode switching with push-pull connector

Secure push-pull type container structure that prevents detachment.

Enhances work efficiency with simple push-pull switching during complex operations.

Compact & Elegant Design for installation in narrow spaces

Space-saving compact design for users.

Adaptive Cooling system ensures noiseless operation and smooth performance.

Flexible Marking and Cutting with Combined Toolpaths

Combined toolpaths incorporating various laser characteristics.

Automatic focusing on marking surfaces at different heights for multi-level marking.

High-speed rotary marking on a per-character basis.

Flexible Marking and Cutting with Combined Toolpaths

Combined toolpaths incorporating various laser characteristics.

Automatic focusing on marking surfaces at different heights for multi-level marking.

High-speed rotary marking on a per-character basis.

User-Friendly Features for Easy Operation

Built-in automatic Z-axis control for platform height.
Standard automatic dust collector ON/OFF function.
Built-in status indicator lights for checking machine status.

Upward-Opening Safety Door

Built-in soft hinge enables smooth operation of the safety door with minimal force.
Upward-opening design provides a wide open feel and ample space for operating the machine.

Built-in Eye Protection Window

Allows users to check machine operation without the need for safety goggles.
A safe device that blocks external laser emission below the limits defined for Class 1 certification.

Various Features for Safe Machine Operation

Chamber-type structure completely blocks dust dispersion and invisible laser radiation.
Optimized internal airflow within the chamber for powerful dust collection efficiency.

Automatic Dust Collector Control

Prevents dust dispersion caused by user oversight through automatic dust collector control.
Equipped with dual safety sensors to protect users from laser-related hazards during operation.

Multipurpose Desktop Engraving Machine

MAGIC™-E7

The MAGIC™-E7 is a customer-friendly, multi-purpose desktop engraver that meets a wide range of user needs through its user-centered design, enhanced performance, significantly improved usability and functionality, and various optional devices for expanded capabilities. Its modern design blends seamlessly into any space, providing both aesthetic satisfaction and practical value.

Specification

Size	402.5mm(W) x 376.5mm(D) x 352.5mm(H)
Engraving Area	140mm(X) x 100mm(Y) x 38.5mm(Z)
Resolution	(XY) 0.0025mm / (Z) 0.000625mm
DC Motor Output	38W
Spindle Motor RPM	MAX 15,000RPM
Weight	26Kg
Power Consumption	58W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4 GHz
Transmission Output	MAX +4dBm
Communication Distance	Class 2 (10M)

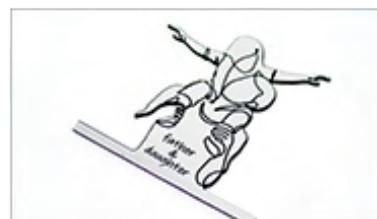

video

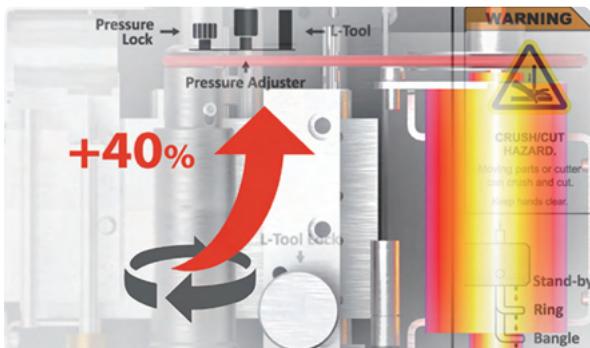

Engrave, carve, and cut jewelry, rings, pendants, tags, keychains, watches, lighters, and more.

Works on metals, wood, and plastics for versatile applications.

- from jewelry making/engraving to industrial marking.
- Easy to use and compact in size — anyone can use it.
- Enhanced cutting performance and twice the resolution compared to similar models.
- All-in-one engraver with both flat and rotary clamps built-in.
- Supports engraving, cutting, and marking.
- Automatic measurement function for materials and tools.
- Simple positioning using camera and laser.
- Expandable functionality with various optional clamps and accessories.
- Easy and fast engraving with dedicated software.
- Built-in Bluetooth for wireless control via tablet.
- Supports tablet/mobile apps.
- Dedicated software provided.

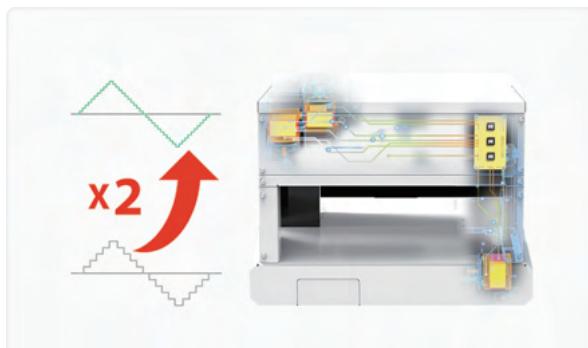

Stronger and Higher-speed Cutting Performance

The machine is equipped with a more powerful spindle motor with a spinning capacity of 15,000RPM.

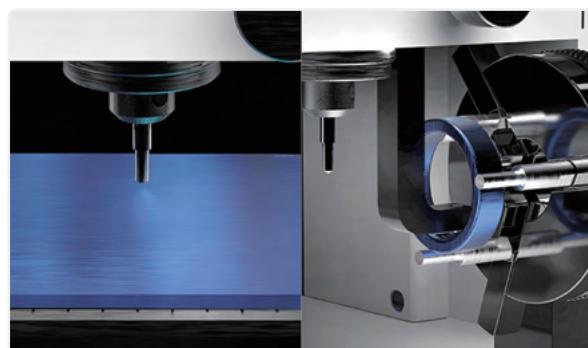

It offers a higher-speed cutting performance, improved cross section quality, and longer lasting, durable tools.

Latest Third Generation Motor Control System

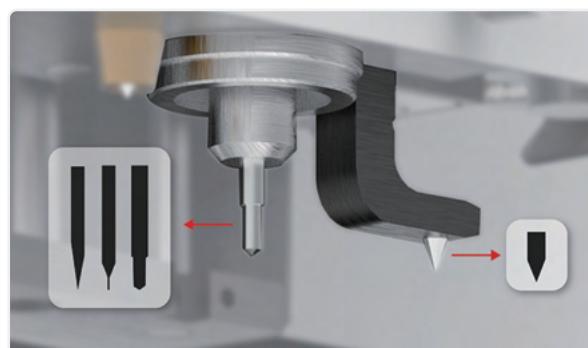

The machine has a resolution that is twice as high as the previous models.

The noise level of the machine is greatly reduced to create a favorable working environment.

All-In-One Desktop Engraver

This single engraving machine is ideal for both flat and rotary engraving.

Various Tools Available for Various Purposes

It is also ideal for scribing marking where materials are pressed to create a mark.

The embedded L-tool makes the engraving on the inside of rings/bangles quick and easy.

Easy Design Work Control with Built-in Camera

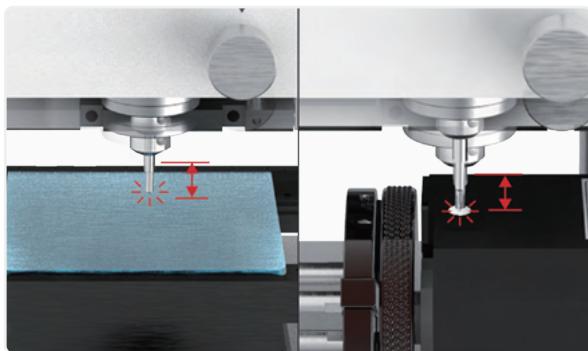

A laser pointer is also built in for users to easily locate and adjust the engraving position.

Easy Expansion of Functions

The pendant clamp can be adjusted for the materials' height to engrave on materials with different thickness.

The machine offers various optional devices that are used to firmly hold the materials, and to easily engrave on materials with various forms.

Auto Measurement

It sets the tool to its origin point automatically.

Supports Various Engraving Types

It enables application of various effects on engravings to create high-quality marks.

Lasting, High-Quality and Polished Finish

Leaves a shiny, smooth, polished finish.

Bluetooth Wireless Connection

Users can wirelessly control the machine by using their own tablets.

The machine comes with easy-to-use software called MagicEngrave™.

Multipurpose Flatbed Engraving Machine

MAGIC™-E4

MAGIC™-E4 is a third-generation desktop engraving machine with enhanced functionality, stability, performance, and design. It supports engraving, cutting, and marking on various materials and shapes. Ideal for plates, signage, souvenirs, promotional items, and industrial parts. Easy to use for anyone, with versatile applications across metal, acrylic, wood, and more.

[video](#)

Specification

Size	402.5mm(W) x 376.5mm(D) x 352.5mm(H)
Engraving Area	240mm(X) x 158mm(Y) x 38.5mm(Z)
Resolution	(XY) 0.0025mm / (Z) 0.000625mm
DC Motor Output	38W
Spindle Motor RPM	MAX 15,000 RPM
Weight	25Kg
Power Consumption	58W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz
Transmission Output	MAX +4dBm
Communication Distance	Class 2 (10M)

Engraves and cuts acrylic, plastics, wood, modeling boards, jewelry, pet tags, keychains, and metals with ease.

- Built-in Bluetooth for wireless control via tablet
- Engraving on acrylic, various plastics, wood, and modeling boards
- Marking on all metals including stainless steel, aluminum, and brass
- Cutting of gold, silver, copper, brass, aluminum, acrylic, plastics, and wood
- 2.5D relief carving for three-dimensional designs
- Large work area supports processing of bigger materials
- Compatible with various tools such as end mills, V-cutters, and scribing tools
- Built-in camera and laser pointer for intuitive and easy positioning
- Auto measurement of material height and tool length
- Low running cost with minimal consumables
- Compact design and easy operation for all users
- Fast and simple engraving with dedicated software
- Supports tablet and mobile app control

Multipurpose Jewelry Engraver

MAGIC™-E3

MAGIC™-E3 is a versatile engraving machine designed for engraving, cutting, and marking a wide range of materials in various shapes and sizes. It represents a significant advancement in functionality, structural stability, performance, and design. It is ideal for plate marking applications such as name tags, badges, and signage, as well as processing materials like acrylic and brass. It is designed to engrave directly onto a wide variety of products and materials, making it suitable for signage, souvenirs, promotional items, industrial nameplates and parts, and more. It can also be used for cutting and processing acrylic, wood, and modeling boards. MAGIC™-E3 can be used easily by anyone from beginners to professionals.

video

Specification

Size	310.5mm(W) x 350.5mm(D) x 324.5mm(H)
Engraving Area	145mm(X) x 110mm(Y) x 38.5mm(Z)
Resolution	(XY) 0.0025mm / (Z) 0.000625mm
DC Motor Output	27W
Spindle Motor RPM	MAX 12,000 RPM
Weight	20Kg
Power Consumption	25W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz
Transmission Output	MAX +4dBm
Communication Distance	Class 2 (10M)

Engrave, mark, and cut jewelry, tags, keychains, and more.

Compatible with metals, wood, and plastics.

- Built-in Bluetooth for wireless control via tablet.
- Compatible with tablet and mobile apps.
- Equipped with an electronic switch.
- All-in-one machine for engraving, marking, and cutting.
- Supports newly added 3D marking methods.
- Versatile use with various jigs.
- Capable of engraving on all metal materials, including gold, silver, copper, brass, and stainless steel.
- Supports fixation of pendants in various shapes and sizes.
- Easy positioning with laser pointer.
- Dedicated software provided.

Multipurpose Jewelry Engraver

MAGIC™-S7

The MAGIC™-S7 is a leading jewelry engraver widely used in the global jewelry and accessory markets. It represents a groundbreaking advancement in functionality, structural stability, performance, and design excellence as a versatile desktop engraver. Designed to handle the unique complexities of jewelry engraving, including a wide range of shapes, materials, and sizes, all within a single machine, it enables anyone to quickly and easily mark various jewelry products such as rings, pendants, and bracelets.

Specification

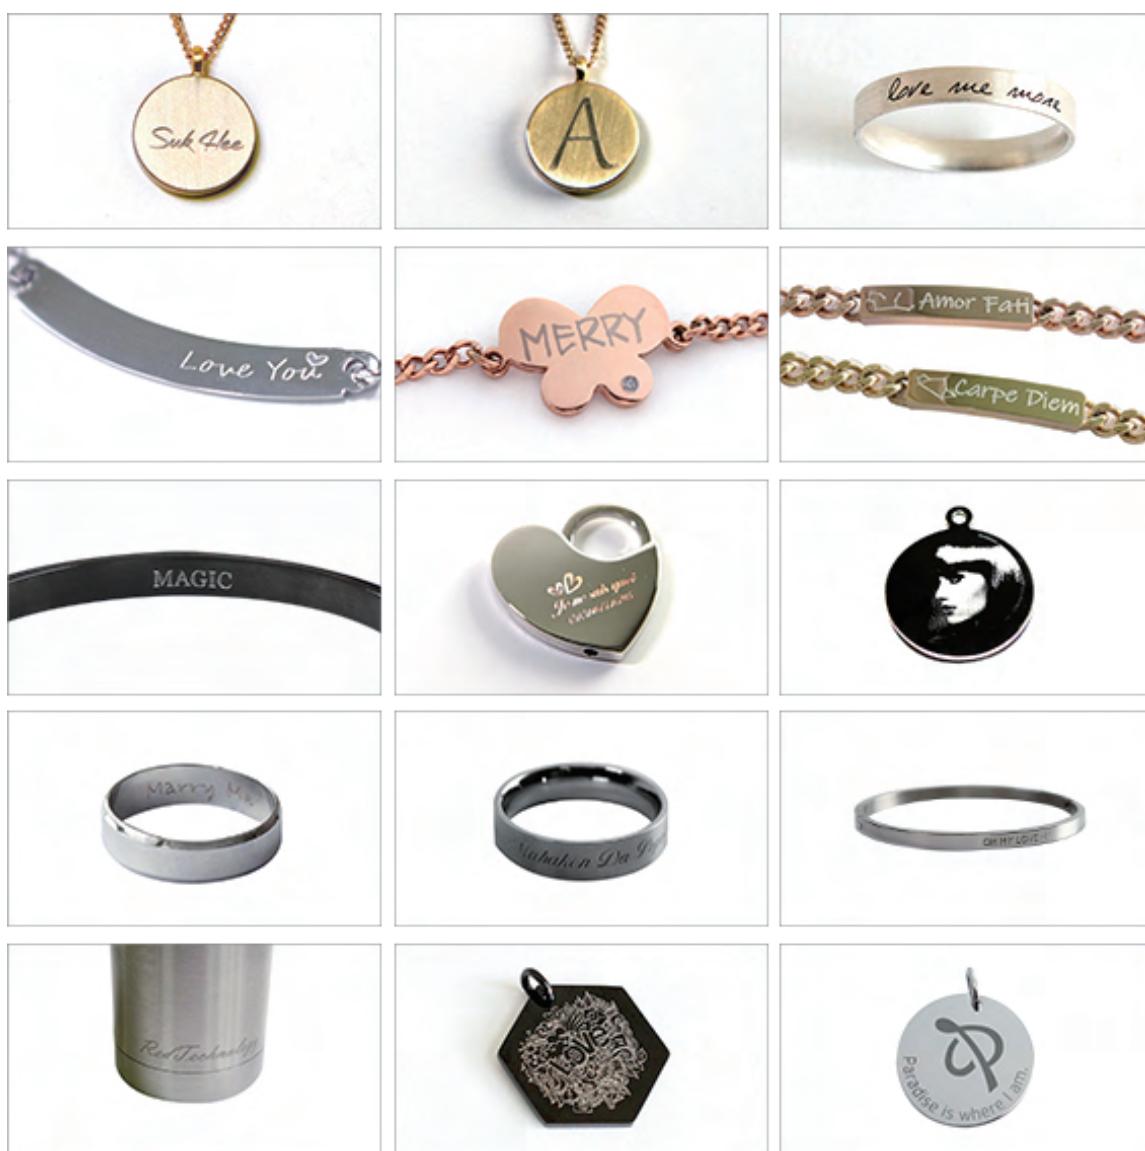

Size	402mm(W) x 376mm(D) x 352mm(H)
Engraving Area	140mm(X) x 100mm(Y) x 38.5mm(Z)
Resolution	(XY) 0.0025mm / (Z) 0.000625mm
Tool Diameter	4mm
Tool Type	Diamond
Weight	26Kg
Power Consumption	24W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz ISM Band
Transmission Output	+2dBm(Typical)
Communication Distance	Class 2 (10M)

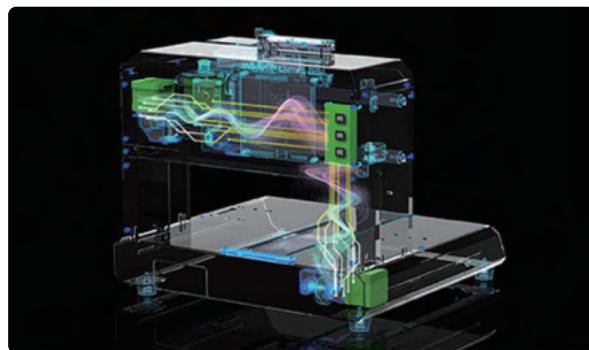

video

Engraves pendants, jewelry, rings, tags, keychains, watches, lighters, and more metal items.

- Engraves on a variety of jewelry products including inner and outer surfaces of rings, pendants, bracelets, and bangles.
- Engraves on all metal materials such as gold, silver, copper, brass, titanium, stainless steel, and aluminum.
- All-in-one engraver equipped with both flat clamps and rotary clamps.
- High-quality mirror-like engraving using a dedicated diamond tool.
- Intuitive and easy positioning control with built-in camera and laser pointer.
- Automatic material height measurement function.
- Economical maintenance with low consumable costs.
- Compact size and simple operation make it easy for anyone to use.
- Fast and easy engraving with dedicated software.
- Built-in Bluetooth for wireless control via tablet.
- Supports tablet and mobile apps.

Innovative Functions and Features

Redesigned design, components, and functions through the application of new and latest technologies.

Significant improvements in functionality, structural stability, performance, and design quality.

Latest Third Generation Motor Control System

Device control with twice the resolution compared to previous models.

Significantly improved engraving quality with finer detail expression.

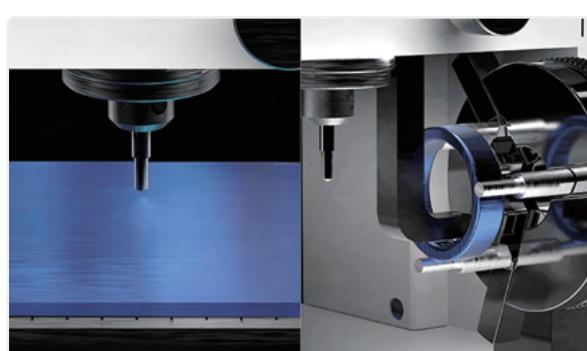

Diamond Scribing

Engraving with a diamond tool creates a polished, reflective surface that gives the engraving a premium, luxurious look.

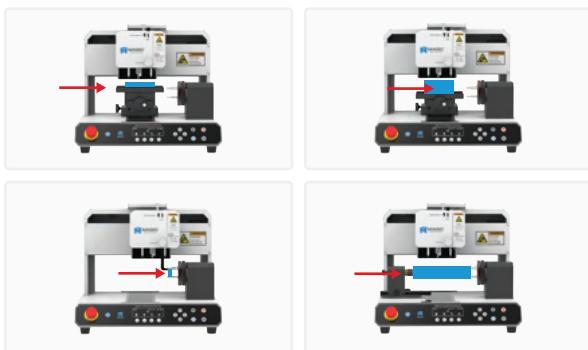

Supports Various Engraving Types

Supports various engraving methods that can be selected according to the intended application.

Flat and rotary engraving in one

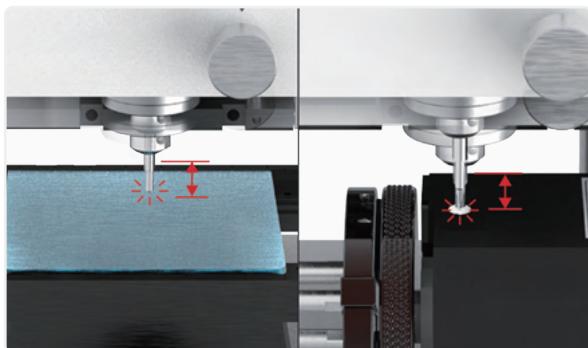

Equipped with both a flat clamp for engraving on flat materials and a rotary clamp for engraving on round items like rings.

Easy Function Expansion

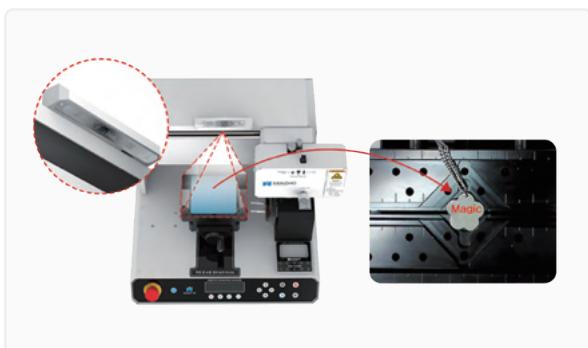

Detachable clamp structure allows for quick and easy clamp replacement based on application.

Height-adjustable clamp design enables engraving on materials of different thicknesses.

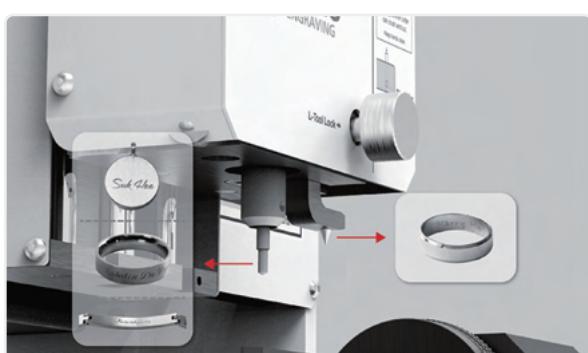

Auto Measurement Function

The machine has auto measurement sensors that measure the length of the tool and detect the height of the material.

Easy Design Work Control with Built-in Camera

Design directly on the material image using the built-in camera and engrave instantly.

Built-in Tools for Flat and Rotary Engraving

An internal diameter-engraving tool is embedded to engrave on the inside of rings or bangles.

The machine enables quick and easy engraving as switching of tools for different materials is not necessary.

Bluetooth Wireless Connection

Users can wirelessly control the machine by using their own tablets.

The machine comes with easy-to-use software called MagicEngrave™.

Multipurpose Flatbed Scribing Machine

MAGIC™-S4

The MAGIC™-S4 is a desktop engraver designed for marking flat materials of various sizes. It represents a breakthrough in functionality, structural stability, performance, and design completeness. Engineered to mark directly on plates, such as nameplates and signage, as well as on products of different shapes and sizes, it is ideal for a wide range of applications including signage, souvenirs, promotional items, and industrial marking. Anyone can perform engraving easily and quickly with its ser-friendly interface.

Specification

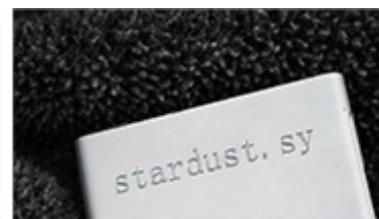

Size	402.5mm(W) x 376.5mm(D) x 352.5mm(H)
Engraving Area	216mm(X) x 158mm(Y) x 38.5mm(Z)
Resolution	(XY) 0.0025mm / (Z) 0.000625mm
Tool Diameter	4mm
Tool Type	Diamond
Weight	24.3Kg
Power Consumption	24W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz ISM Band
Transmission Output	+2dBm(Typical)
Communication Distance	Class 2 (10M)

Engraves industrial nameplates, components, jewelry, tags, keychains, watches, lighters, and more.

Compatible with a wide range of metal materials for versatile applications.

- Engraves on all metal materials, including gold, silver, copper, brass, titanium, stainless steel, and aluminum.
- Large work area enables engraving on bigger materials.
- High-quality mirror-like engraving using a dedicated diamond tool.
- Built-in camera and laser pointer for intuitive and easy positioning.
- Automatic height measurement of materials.
- Detachable vise structure allows clamp replacement for different applications.
- Economical maintenance with minimal consumable costs.
- Compact size and simple operation make it easy for anyone to use.
- Built-in Bluetooth for wireless control via tablet.
- Supports tablet and mobile apps.
- Equipped with an electronic switch.
- Dedicated software provided.

Compact Engraving Machine

MAGIC™-S3

The MAGIC™-S3 is an engraving machine designed for marking on a wide range of flat materials. It represents a breakthrough in functionality, structural stability, performance, and design. Engineered for versatility, it allows direct marking on various items and surfaces including pet ID tags, jewelry & accessories, cosmetic & perfume cases, industrial nameplates, and parts of different sizes and shapes. Its user-friendly interface ensures that anyone can perform clean and precise engraving quickly and easily.

Specification

Size	310.5mm(W) x 350.5mm(D) x 324.5mm(H)
Engraving Area	145mm(X) x 120mm(Y) x 38.5mm(Z)
Tool Diameter	4mm
Tool Type	Diamond
Weight	19.6Kg
Power Consumption	24W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz ISM Band
Transmission Output	+2dBm(Typical)
Communication Distance	Class 2 (10M)

Precisely engraves pendants, jewelry, tags, keychains, watches, and more on metals, wood, and plastics.

- Built-in Bluetooth for wireless control via tablet.
- Supports tablet/mobile apps.
- Equipped with an electronic switch.
- Supports newly added 3D engraving methods.
- Versatile use with a variety of jigs.
- Detachable vise structure allows clamp replacement for different applications.
- Engraves on all metal materials including gold, silver, copper, brass, and stainless steel.
- Compact design suitable for installation in small spaces.
- Laser pointer for easy positioning of engraving location.
- Comes standard with a durable diamond tool to minimize maintenance costs.
- Dedicated software provided.

Pendant & Ring Engraving Machine

MAGIC™-5S

The MAGIC™-5S is a multifunctional engraver capable of marking both the inside and outside of rings, as well as pendants, all with a single compact machine. It quickly engravess text or patterns onto rings, pendants, and more. With its lightweight and stylish design, it can be used anywhere. It operates with virtually no noise and is extremely easy to use, allowing anyone to create beautiful markings quickly and effortlessly. Additionally, it features built-in Bluetooth for wireless control using the dedicated MagicTablet™ app.

[video](#)

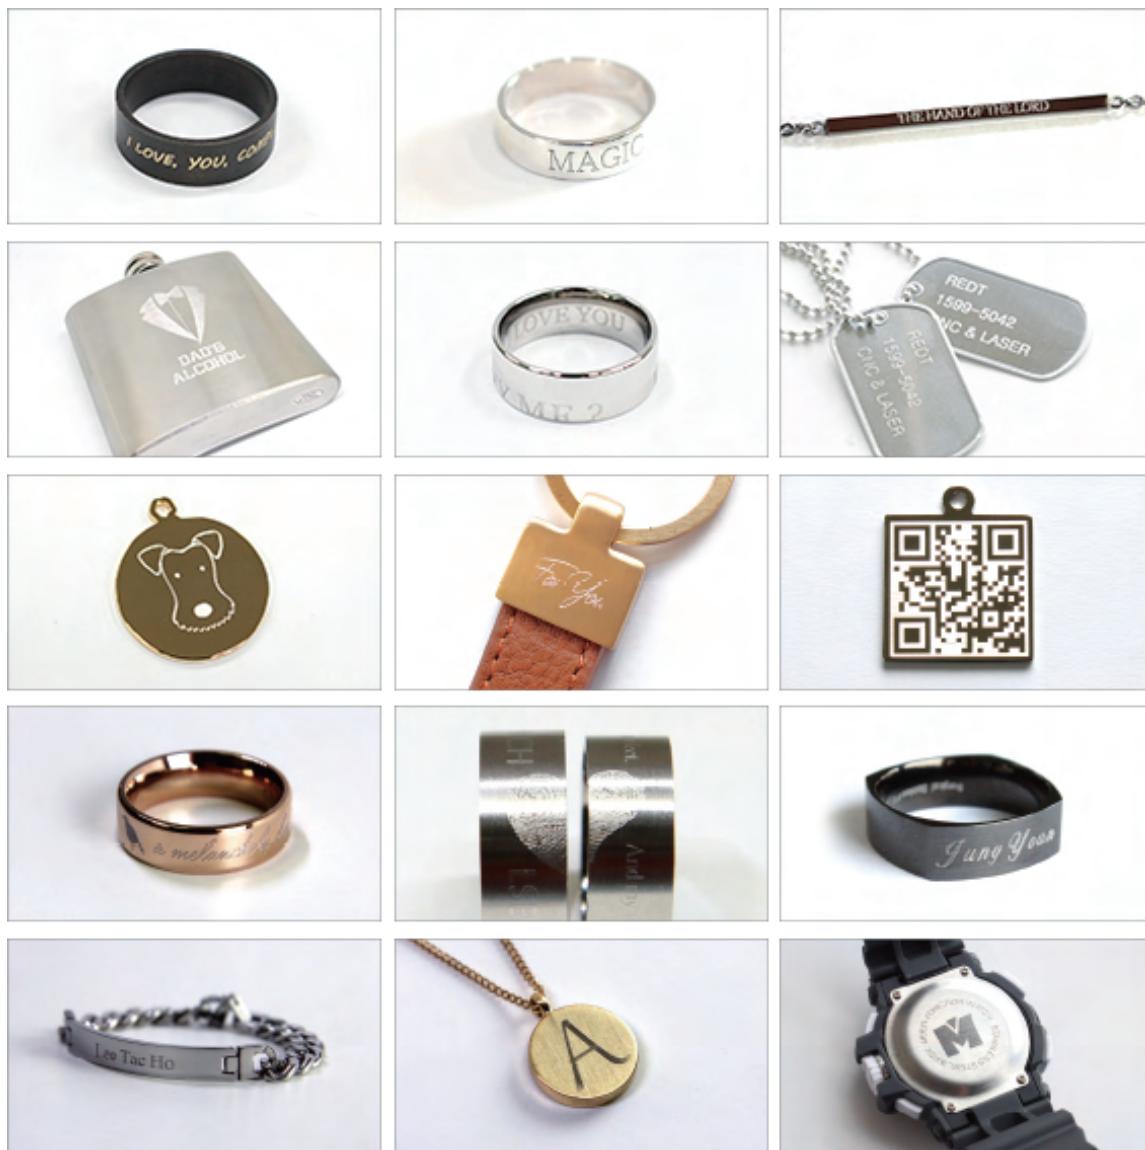

Specification

Size	388mm(W) x 323mm(D) x 267mm(H)
Engraving Area	120mm(X) x 100mm(Y) x 30mm(Z)
Tool Diameter	3.175mm
Weight	21Kg
Max. Cylinder Diameter	Outer Diameter 39mm / Inner Diameter 14~30mm
Power Consumption	21W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz ISM Band
Transmission Output	+2dBm(Typical)
Communication Distance	Within 10M

Engraves pendants, jewelry, rings, tags, keychains, watches, lighters, and other metal items with precision.

- Built-in Bluetooth for wireless control using the dedicated MagicTablet™ app.
- Supports tablet and mobile app control.
- Lightweight aluminum body for enhanced portability.
- Equipped with an electronic switch.
- Supports newly added 3D marking methods.
- Increased versatility with various jigs.
- Engraves on all metal materials including gold, silver, copper, brass, and stainless steel.
- Compact design allows installation even in small or narrow spaces.
- Easy marking position adjustment with laser pointer.
- Comes standard with a durable diamond tool to minimize maintenance costs.
- Includes dedicated software. (MagicEngrave™)

Pendant Engraving Machine

MAGIC™-2S

The MAGIC™-2S is an engraving machine that uses a diamond tool to mark permanent text or patterns on precious and metal materials such as gold, silver, copper, brass, and stainless steel. With its lightweight and sleek design, it can be used anywhere. It operates with minimal noise and is extremely easy to use, allowing anyone to create clean and beautiful markings quickly and effortlessly. In addition, it features built-in Bluetooth for wireless control using the dedicated MAGIC tablet™.

[video](#)

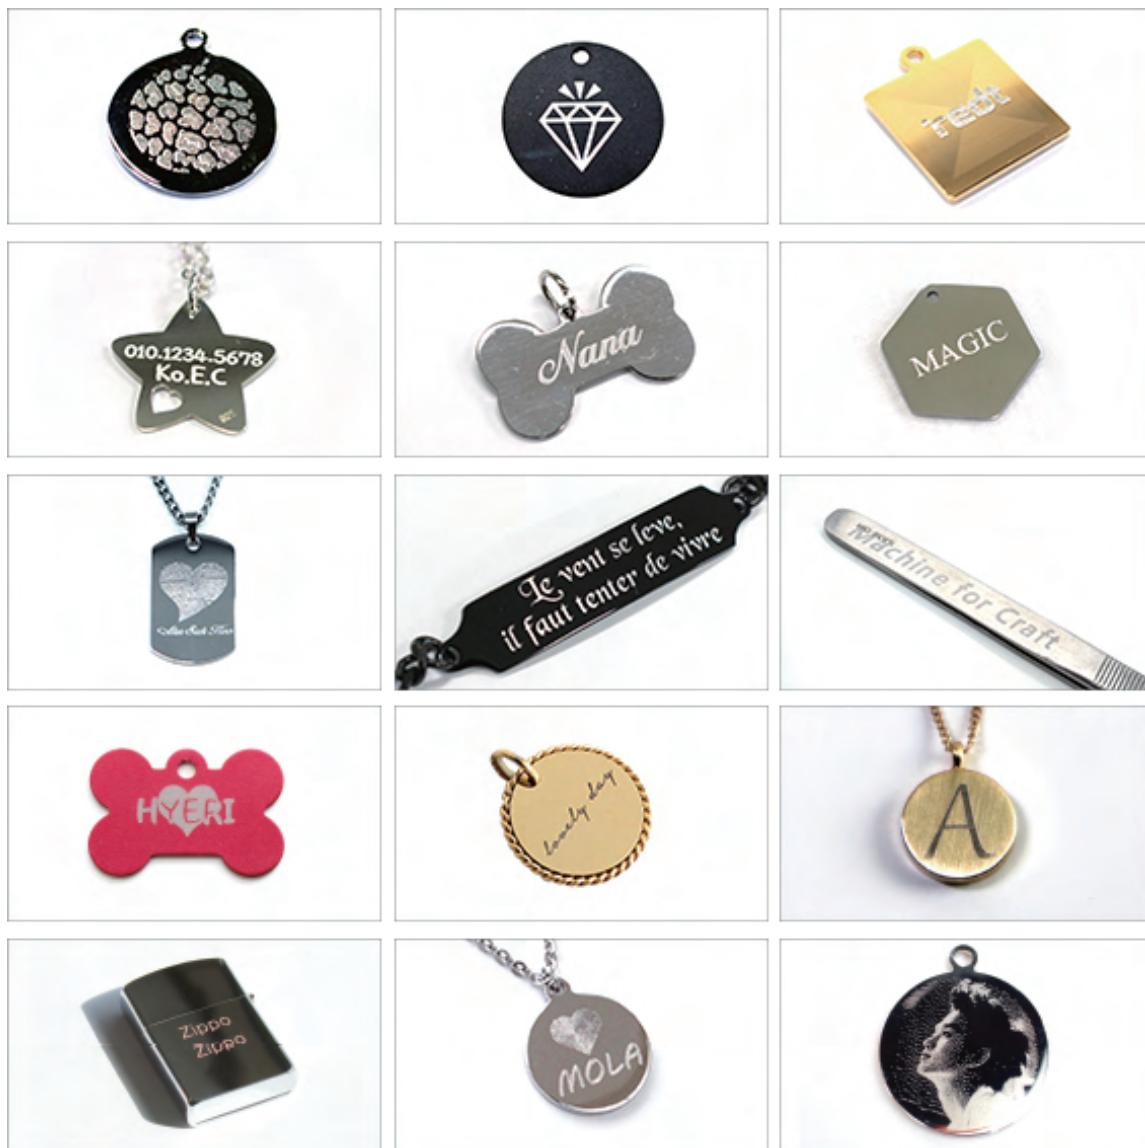

Specification

Size	258mm(W) x 274mm(D) x 339mm(H)
Engraving Area	105mm(X) x 100mm(Y) x 28.5mm(Z)
Tool Type	Diamond
Tool Diameter	4mm
Weight	15Kg
Power Consumption	12W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz ISM Band
Transmission Output	+2dBm(Typical)
Communication Distance	Within 10M

Engraves pendants, jewelry, ID tags, bracelets, keychains, watches, lighters, and other metal items with precision.

- Wireless control via dedicated tablet using built-in Bluetooth.
- Supports tablet/mobile apps.
- Lightweight aluminum body enhances portability.
- Built-in electronic switch.
- Supports newly added imprint marking methods.
- Comes standard with high-durability diamond tool to minimize maintenance costs.
- Engraves on gold, silver, copper, platinum, stainless steel, and other metals.
- Can be installed in compact or narrow spaces.
- Easy positioning with laser pointer.
- Increased versatility with various jigs.
- Includes dedicated software. (MagicEngrave™)

Compact Ring Engraving Machine

MAGIC™-1S

Magic™-1S is a CNC engraver for marking on inner and outer of rings. It's light, sophisticated, less noise, portable and easy to use for anyone. Also, it has wireless controlled Bluetooth, compatible with tablet.

Specification

Size	233mm(W) x 278mm(D) x 323mm(H)
Tool Type	Diamond
Tool Diameter	3.175mm
Weight	13Kg
Rotary	Outer Diameter 32mm / Inner Diameter 34mm
Power Consumption	12W
Power Supply	AC 100~240V 50/60Hz
Bluetooth Standard	V2.1
Frequency	2.4GHz ISM Band
Transmission Output	+2dBm(Typical)
Communication Distance	10M

Engraves on the inside and outside of the rings.

- Wireless controlled bluetooth with compatible tablet.
- Supports touch-interface with tablet. (tablet purchased separately)
- Our system supports customers to design their own with tablets.
- Improved portability with lighter aluminum body.
- Internal electric switch.
- Highly durable diamond-tipped drill reduces maintenance cost.
- Engraves almost every kind of metal. (gold, silver, bronze, jewelry, stainless and etc.)
- Compact sized engraver can fit in any small areas.
- Easy coordination with laser pointer.
- Sophisticated and luxurious design.
- Provides upgraded program.

Embossing Die Engraving Machine

IMP™-C1

IMP™-C1 is designed user-friendly to allow anyone to make engravings on brass or acrylic fast and easy. Creates custom molds, enabling hot gold foil stamping for highly precise and detailed leather wood and paper marking. These tools rotate at a speed of 14,500RPM and does automatic switching to produce a precise, high-quality embossing die in an instant.

[video](#)

Specification

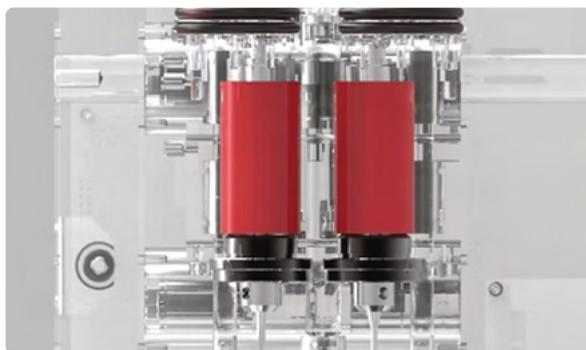

Size	270mm(W) x 352mm(D) x 360mm(H) mm
Engraving Area	45(X) x 75(Y) x 30(Z) mm
Weight	23.7Kg
Power Supply	AC 100~240V 50/60Hz
Power Consumption	30W
Spindle Motor RPM	14,500RPM
Spindle Motor	36W, DC
Display	2.4inch Graphic LCD
Temperature / Humidity	15°C~40°C / 10%-90%

Ideal for leather craft studios, product shops, watch and pet stores, print and mold workshops, and more.

- Faster production by automatically changing between roughing and finishing cutting tools with the use of two 14,5000 RPM spindle motors.
- Tool lifespan is fairly extended with the use of different roughing and finishing cutting tools.
- Easy to fix the materials in place with optimized clamp.
- 75×45 working area gives the ability to engrave most leather stamps.
- Easy tool change with a Setscrew spindle.
- Automatically checks the tool's height.
- Automatically processes all fragmented actions once the user locks the material in place.
- Accurate and low-noise Z-axis with built-in ball screw.
- Guide shield structure minimizes the chips getting stuck on the feed shaft.
- Shortened engraving time with various standardized brass molds.
- Capable of making leather cutting dies and leather stamps with specialized software.
- Able to design not only alphabets and Arabic numbers but also patterns and logos.
- Reasonable maintenance with expendables being only the tools and spindle belt.

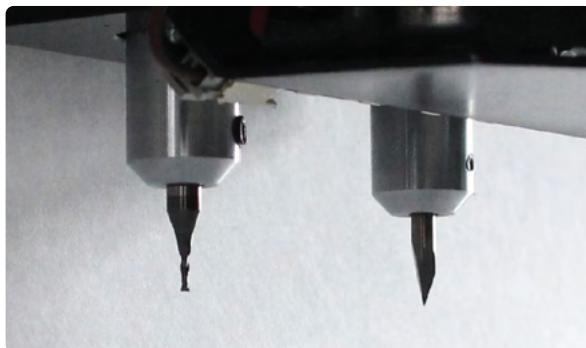

Spindle

Equipped with two 14,500 RPM spindle motors.

Equipped with two cutters and automatically changes tools.

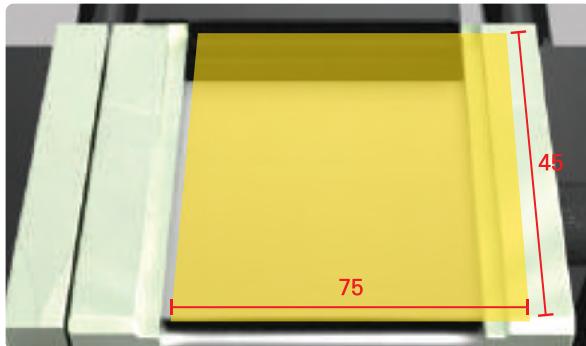

Tool lifespan is extended with automatic tool changing system.

Auto-Measure Feature

Tool lifespan extended by with the use of different roughing and finishing cutters.

Automatic material measurement allows the user to fix the material and handle all remaining engravings automatically.

Working Area

75 x 45 mm sufficient working area for most embossing die molds.

Directly Access to Materials

Redt supplies materials in different standard sizes used for engraving molds at an affordable price.

Reduces cost by selecting the suitable size of materials thereby making production of single-use molds possible.

Lessens the production time and extends the tools lifespan.

Break Free from Limitations

Traditional leather stamping relied on fixed metal type, limiting fonts, sizes, and languages.

The IMP™-C1 removes these barriers—engrave any language, font, size, or even intricate images and patterns with complete creative freedom.

Saves You Time & Money

Incredibly low material cost, ranging from \$1 to \$3 per die, making it highly cost-effective.

Simple & Quick Software!

MagicEngrave™ allows easy machine operations as all operations are executed automatically.

The user's main and sole task is to simply locate and create the design to be engraved on the workpiece.

Compact & Modern

The machine's modern and sophisticated design, along with its benefits of low noise and easy installation, perfectly suits any workshop or workspace.

Soundproof Box

We also offer a Soundproof box which is an optional item to provide a favorable work environment.

* Optional item

Mold & Stamp Engraving Machine

TURBO™-C3

The TURBO™-C3 is a dedicated engraving machine for cylindrical materials and electronic components, developed to support a wider range of materials and functions than the C1 model. By utilizing the dual-spindle technology introduced in the TURBO™-T series, it achieves stability, performance, and ease of operation while engraving cylindrical materials. It is a product designed to meet the needs of various customers by integrating engraving and stamping technologies into the TURBO™ series, specifically for nameplates and stamps.

[video](#)

Specification

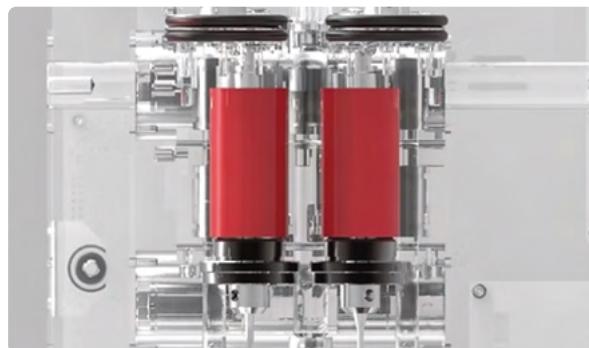

Size	355mm(W) x 396mm(D) x 340mm(H)
Work Area	172(X) x 169.5(Y) x 33(Z) mm
Max.Cylindrical Material	Ø22mm (V-jig) x 143mm (Length)
Max Size of Flat Material	80(W) x 129(D) x 35.5(H) mm
Max Feed Rate	70mm/s
Spindle Speed	14,500 RPM
Weight	22kg
Power Consumption	27W, DC
Power Supply	AC 100~240V 50/60Hz
Tool Diameter	Roughing: 4mm / Finishing: 3mm
Temperature	0°C~40°C
Humidity	10%-85%

Precision, Versatility, and Ease – TURBO™-C3 for Every Engraving Need Where Innovation Meets Precision!

- TURBO™-C3 supports engraving, cutting, and relief functions for a variety of materials, including flat, relief, and cylindrical surfaces.
- Dual-spindle technology and advanced features ensure seamless operation, enhancing engraving precision on diverse materials.
- Designed for ease of use with a stable structure, making it ideal for both professionals and beginners, delivering top-tier results every time.

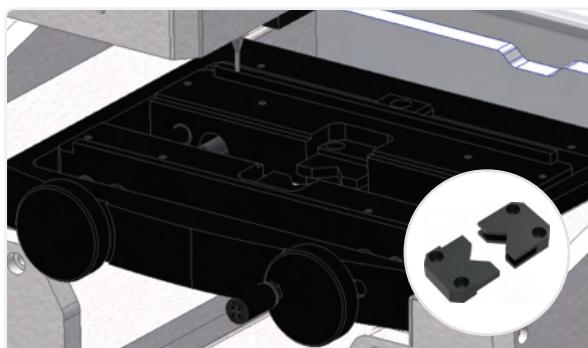

Dual Spindles and Convenient Tool Usage

Equipped with dual 14,500 RPM spindles with automatic tool-switching.

Equipped with set-screw mechanism allows for quick and easy tool replacement.

Expanded Work Area and Optimized Vise

The vise is designed for effortless material securing.

Automatically centering the piece for stable and precise mold engraving.

Expanded work area of 80mm x 100mm x 26mm.

Accommodates a wider range of shapes and sizes.

V-shaped jig securely holds seal materials of varying sizes, from 5-6mm to over 40mm.

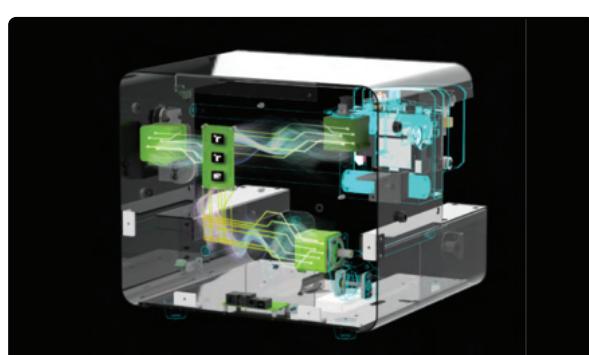

Positioning with Laser Pointer

Allows users to confirm and adjust the engraving area before starting the process.

After transmitting engraving data, users can visually confirm the engraving area on the material and set the exact position with ease.

Ensures accurate engraving placement by previewing the location.

Particularly convenient for curved or flat surfaces.

High-Resolution Position Control Technology

High precision with advanced positioning technology and smooth motion for superior engraving.

Ultra-quiet performance enhances control for detailed work.

More convenience stamp engraving, two key buttons for setting engraving positions.

Automatic Material Size, Height, and Center Measurement System

Equipped with a built-in material measurement sensor.

A probe-based sensor that automatically measures the material's size, height, and center.

Simply secure the material in the machine to complete the setup.

Simplifies the engraving process and ensures precision, making the machine user-friendly for everyone.

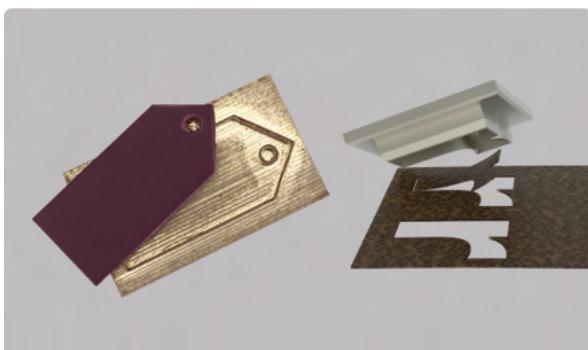

Engraving All Standard Seals

Capable of engraving all standardized seal types including personal seals, corporate seals, company logos, official stamps, departmental seals, and more.

The dedicated software is provided to enable users to engrave the seals in compliance with standard specifications.

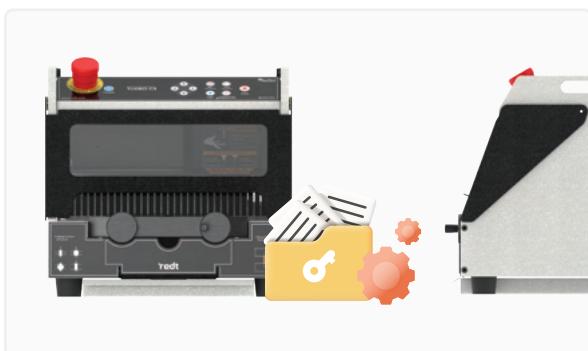

Ensuring that anyone can engrave quickly and easily.

Thomson (Die-Cutting) Capabilities

Allows users to create die-cutting blades (Thomson) by engraving pre-designed blade shapes to the desired thickness and depth.

A capability for on-demand production of blades or samples for small-scale or limited production without the need for outsourcing.

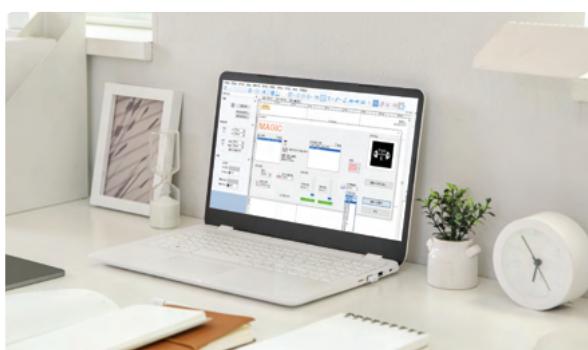

Built-in Setting Information

Stores key machine settings, such as origin information, in its internal memory.

Eliminates the need to reconfigure origin settings when switching computers.

Allowing the machine to be used immediately without additional setup.

Simple & Quick Software

MagicEngrave™ allows easy machine operations as all operations are executed automatically.

The user's main and sole task is to simply locate and create the design to be engraved on the workpiece.

Designed for Simplicity, Engineered for Efficiency

Designed with a focus on simplicity, usability, and production efficiency.

With a modern design that fits effortlessly into any workspace.

Delivers a professional-grade engraving experience without compromising on style.

We also offer a soundproof box as an optional item to provide a more comfortable work environment.

Key Production Solution

MIRACLE™-A9 Nova

MIRACLE™-A9 Nova is Redt Inc.'s latest model, embodying our accumulated expertise in key-cutting technology and design innovation. It delivers performance that surpasses not only our previous models but also competing products. Equipped with state-of-the-art control technology and user-centric design, it ensures fast, precise, and safe operations. Its sleek, modern appearance complements any workspace with style.

Specification

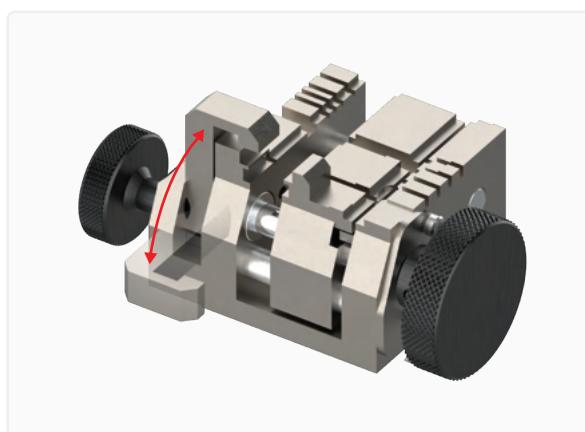

Size	300mm(W) x 423mm(D) x 338mm(H)
Power Supply	AC 100V~240V, 50Hz/60Hz
Operating Power	24V, 6A
Power Consumption	80W
Weight	20 kg
Power Adapter	24V/4A
XYZ Trave	X:130mm Y:58mm Z:40mm
Spindle Rotation Speed	7,000 rpm
Spindle Motor Specification	40W, BLDC, Direct-drive (Integrated)
Tool Shank Diameter	6Φ
Tool Clamping Method	Set Screw
Communication	USB
Temperature / Humidity	5°C~40°C / 10%~90%

Supports large-head keys with fast, precise cutting. Easy, safe operation with intuitive UI.

- Equipped with a Built-in Motor Spindle, featuring a high-performance BLDC motor for enhanced cutting power.
(integrated spindle motor)
- Dual clamp system allows processing of various key types without the need for separate clamps or adapters.
- LM guides applied to all three axes for greater precision and stability.
- Dedicated application compatible with a wide range of digital devices.
- Supports large-head materials such as remote control keys.
- Intuitive user interface for smooth operation.
- Designed for fast, easy, and safe use by anyone.
- Innovative design that breaks away from conventional standards.
- With the built-in marking function, customer names, phone numbers, logos, and more can be engraved directly onto keys, providing both loss-prevention benefits and a premium service experience. v

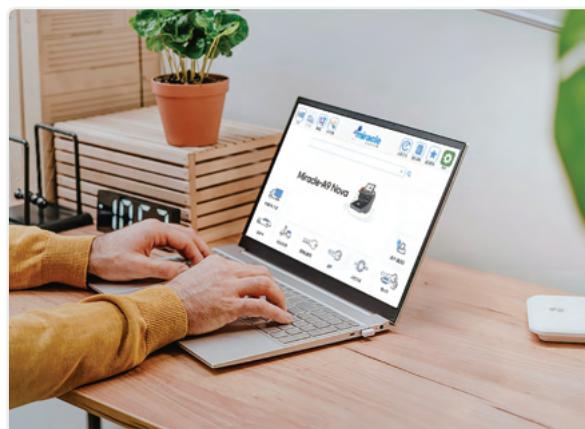

Dual Spindle & Dual Cutter System with Integrated Dual Clamp for Versatile Key Processing

Refined design with a wide acrylic front window, ergonomic carry handle, and universal tablet/mobile stand.

Provides clear visibility of the cutting process while ensuring full operator safety.

Large-handled keys, such as automotive remote and smart keys, can be secured without disassembly.

CodeMaster4 – Multi-Platform & OTA Support

Operate the A9 Nova through the CodeMaster4 app on PC, tablet, or smartphone.

Supports Windows, Android, and iOS, with both wired and wireless options for flexibility.

OTA updates keep the system up to date with the latest features and enhancements.

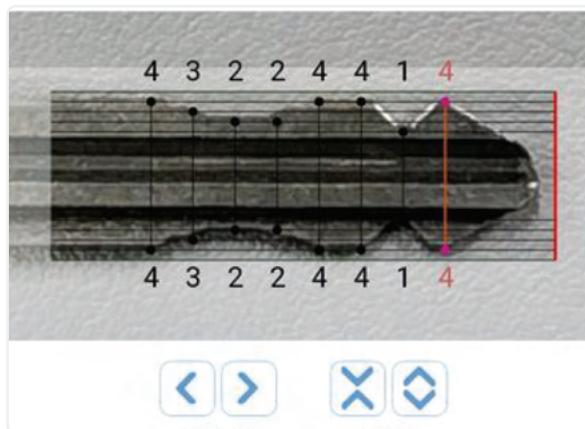

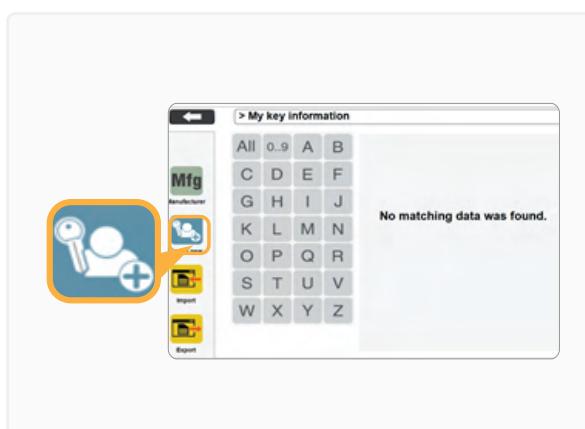

Photo Recognition System

Capture or upload a key image for instant recognition and analysis.

The system automatically extracts shape, groove, and dimension data without manual measurement.

Speeds up workflow, reduces errors, and ensures accuracy even with complex keys.

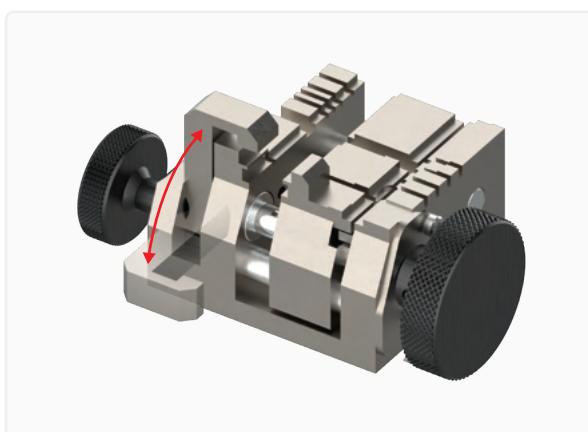

Advanced Capabilities

The A9 Nova integrates customer data and key production history for efficient management.

It is fully compatible with Instacode, giving locksmiths access to a vast key database for faster and more accurate work.

With its built-in marking function, users can engrave names, numbers, or logos, adding personalized value for every customer.

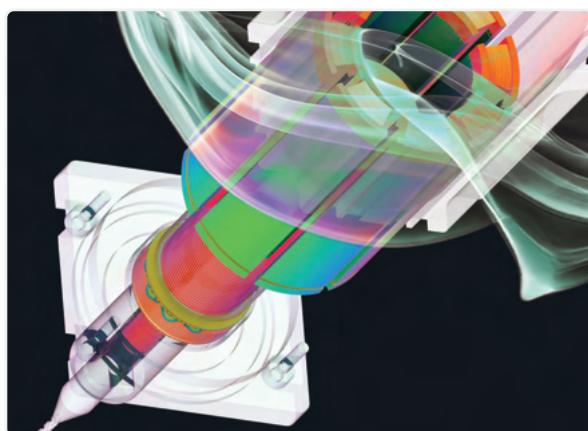

Dual Clamp Supporting Various Keys

Left side supports edge-cut and laser keys, while the right side supports dimple keys — no need to change vises.

Equipped with a top auxiliary clamp for stable securing of edge-cut keys.

Operates easily without additional accessories, enhancing portability and work convenience

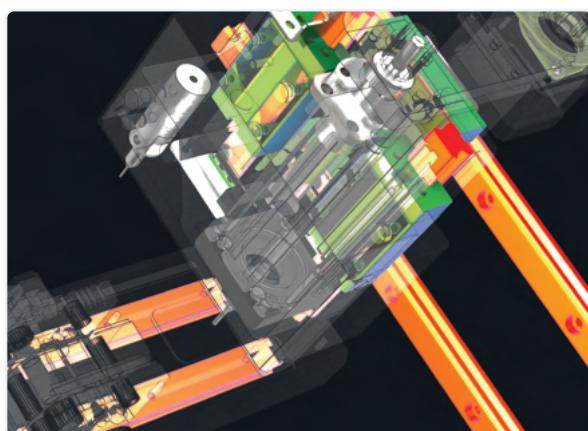

Integrated BLDC Motor Spindle

Direct-drive BLDC motor delivers power without belts or gears minimizing energy loss.

Offers high efficiency, reduced heat, and long life for stable performance.

Maintains consistent cutting power, even under heavy workloads.

High-Precision LM Guide

Dual LM guides applied to each axis ensure rigidity and precise motion.

Load distribution minimizes vibration and backlash for smooth, accurate machining.

Delivers consistent quality and durability in daily operation.

Why MIRACLE™-A9 Nova?

Combines premium design, smart connectivity, and powerful performance in one compact solution.

Built for professionals who demand speed, precision, and reliability.

The MIRACLE™-A9 Nova is a dependable and durable partner for locksmiths in every job.

Key Cutting Machine

MIRACLE™-S10

The MIRACLE™-S10 is a CNC key cutting machine that offers powerful performance, speed, low noise, enhanced safety, and user convenience. It is capable of producing and duplicating not only automotive keys such as single-sided and laser (track) keys, but also residential keys including dimple keys, vending machine keys, and hex keys. The machine and the dedicated MIRACLE™ tablet can be used separately, and Bluetooth wireless communication allows for completely wireless key production.

Specification

Size	362mm(W) x 427mm(D) x 505mm(H)
Resolution	(XY) 0.005mm / (Z) 0.00125mm
Spindle motor power	109W DC Motor
Power Consumption	Stand-by 30W / Operating 135W
Weight	33Kg
Voltage	AC 100~240V 50/60Hz
Work Space	X:67mm Y:56mm Z:47mm(Nonmetal Z:24mm)
Tool Diameter	6mm
Cutter Holder	Set-Screw
Display	10 inch Tablet
Interfaces	USB, Bluetooth
Operating System	Windows
Temperature / Humidity	5°C~40°C / 35%-80%
Spindle Speed	Dimple 10000RPM, Endmill 11800RPM

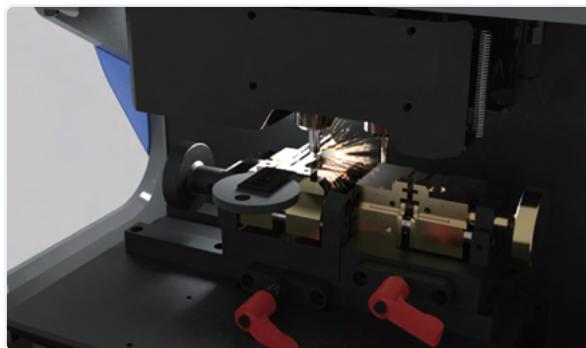

video

MIRACLE™-S10 – high-performance key cutting machine for fast and precise duplication of all key types.

- 10" Touch screen eases operating the device.
- Embedded Bluetooth allows wireless operation with the exclusive tablet.
- Touch screen with faster CPU enables quick response.
- Using Ball-screw and LM guide applied to Z-axis provides more accurate and powerful cutting force.
- Provided manually operating function allows producing remote control keys possible.
- Supports key data upgrade via Wi-Fi wireless network.
- Noise reduction with low-vibration design.
- Using both decoder and cutter simultaneously makes key measurement and duplication faster without replacing tools.
- Supports powerful and stable key production with 27W, 24DC motor.
- Key production log and customer management function are added.
- Equipped tool tray stores tools easily.
- LED lights support night work.

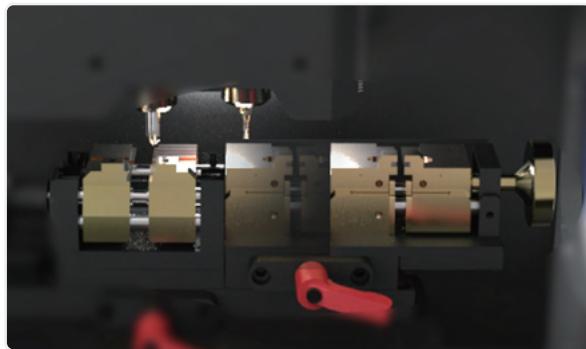

High-Speed Cutting and Powerful Performance

Fast key cutting enabled by the new 4th-generation platform and high-torque motor.

Offers key cutting speeds more than twice as fast as previous models.

Equipped with a high-power 109W DC motor.

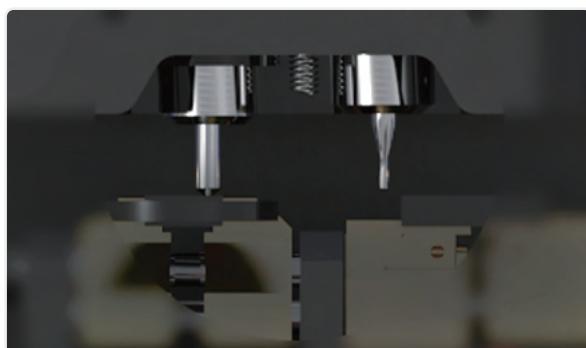

Built-in Sliding Dual Clamp System Minimizes Clamp Changes

Simultaneous installation of two clamps: one for automotive keys and one multi-purpose clamp.

Greatly reduces the number of clamp changes for various types of key cutting.

Simple clamp setup by sliding and securing the clamp left or right.

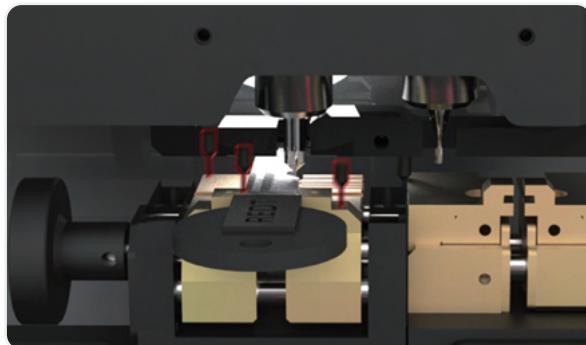

Built-in Dual Spindle and Dual Cutter System to Minimize Tool Changes

Dual spindles allow simultaneous mounting of endmill and dimple cutters, minimizing tool changes.

Minimizes tool changes for various key types.

Automatically selects the appropriate cutter without requiring manual tool selection in the software.

Processes mixed-profile keys like the Mul-T-Lock MT5+.

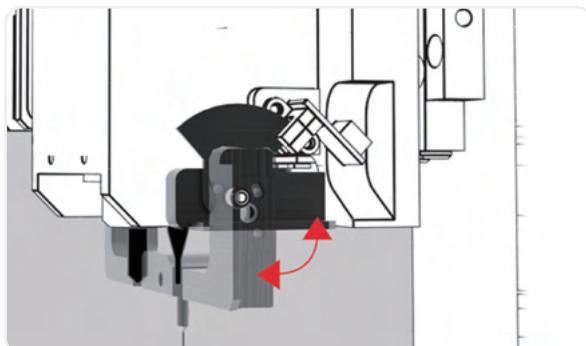

Fully Automatic Key and Clamp Measurement System

Built-in auto-folding decoder enables automatic measurement of keys and clamps.

Automatically detects the key center and tip positions.

Automatic calibration of clamp and clamp jaw positions.

New-Type Auto-Folding Decoder

Equipped with an auto-folding decoder module.

Remains hidden when not in use and unfolds only when needed.

Significantly reduces decoding and measurement time with its automatic folding mechanism.

Supports various functions including clamp and clamp jaw calibration, key center and tip measurement, and key decoding.

Easier Manipulation

Faster and More Stable Built-in 10-inch Microsoft Tablet.

Equipped with a large 10-inch screen tablet.

Uses the latest Microsoft tablet.

Larger screen, more stable performance, and faster response compared to previous models.

Comes preloaded with CodeMaster4™ software for convenient use.

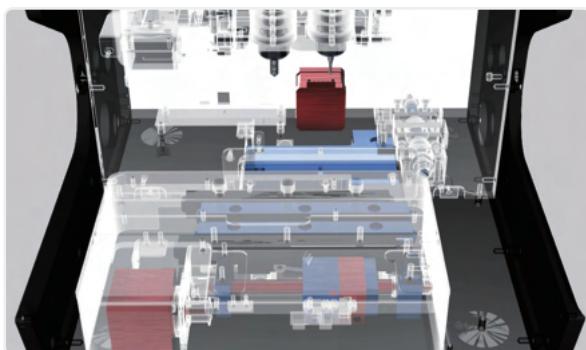

Newly Upgraded CodeMaster4™ Provided

Completely redesigned CodeMaster4™ software included.

Offers code search and pin number validation functions. (for certain keys)

Guides key cutting and decoding tasks step-by-step through an intuitive interface.

Provides illustrated instructions for recommended clamps, jaws, and jigs for the key being cut, enabling easy and intuitive operation.

Newly developed 4th-generation XY platform

Built-in high-precision ball screws.

Built-in high-precision guide system.

Provides significantly stronger torque.

Shield structure applied to prevent internal contamination.

Built-in Bluetooth Wireless Communication

Operate the device wirelessly without cable connections.

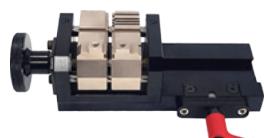

Control the device from multiple tablet PCs or computers via Bluetooth.

Automatic mode switching between USB and Bluetooth connection.

Quick, Easy-to-Use CAD/CAM Software Program

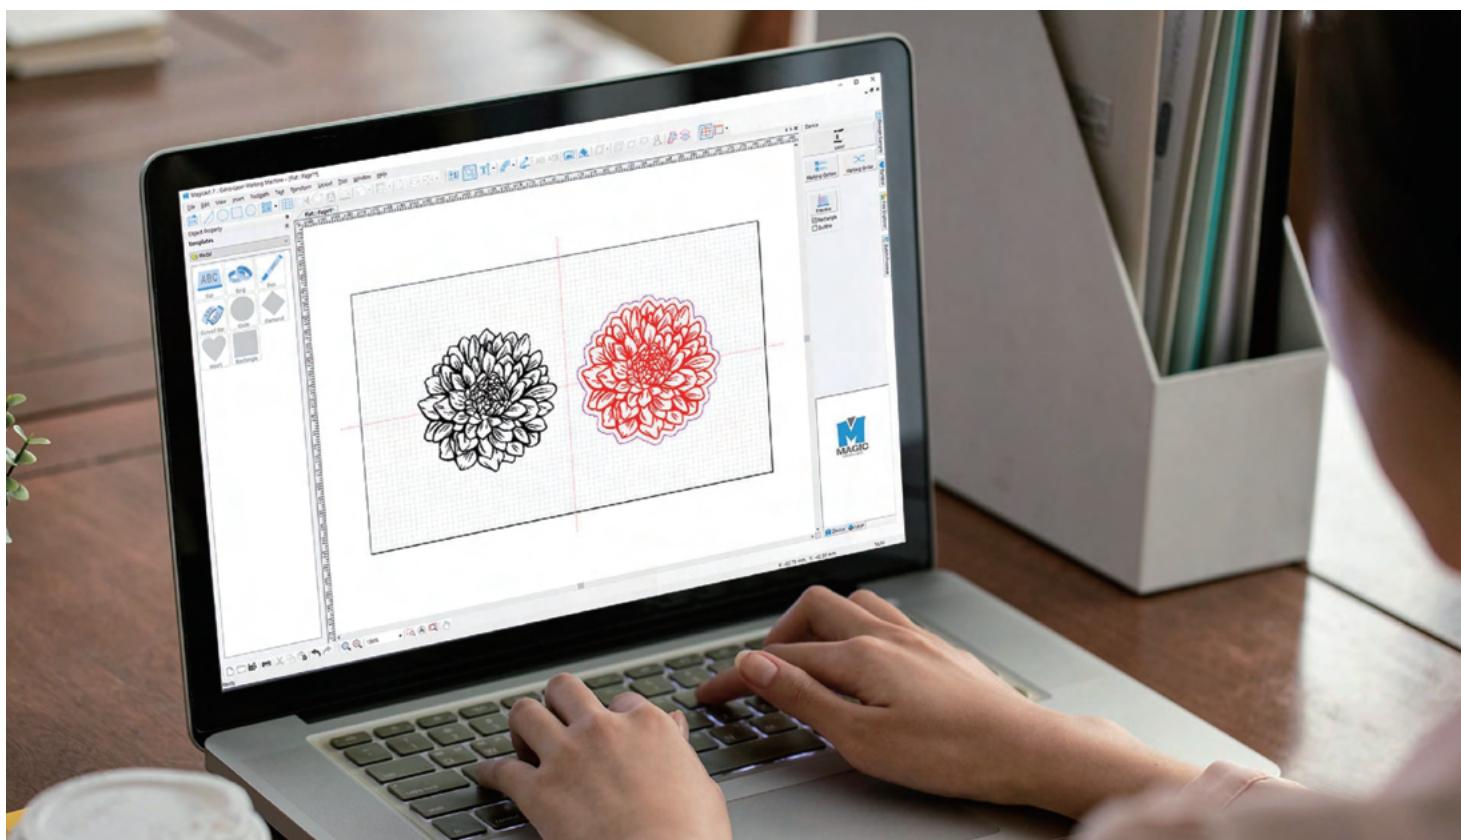

MagicEngrave™

Supported Products

All models in the MAGIC™ Series

Applications

- CNC Engraving
- CNC Cutting
- CNC V-Carving
- CNC Routing
- Laser Marking
- Laser Cutting
- Laser V-Carving
- Laser Engraving

MagicEngrave™, the software provided with all products in the MAGIC™ series, is designed to make MAGIC™ laser marking machines, scribing engravers, and CNC engraving machines easy and intuitive for anyone to use.

This integrated CAD/CAM software enables users to perform design work for marking, cutting, and engraving, and to generate a wide range of toolpaths for these processes. It offers seamless compatibility with popular commercial design programs such as Adobe Illustrator, CorelDRAW, AutoCAD, and Rhino. With a user-friendly interface, direct control of various advanced features across the MAGIC™ product lineup, and a clean, intuitive workflow, MagicEngrave™ allows users of all skill levels to quickly learn and efficiently operate even complex marking, cutting, and engraving tasks.

Experience a new paradigm in laser marking with MagicEngrave™.

Software Features

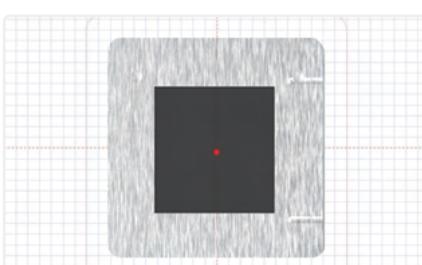

Easy and Fast CAD/CAM Software

MagicEngrave™ supports design and toolpath creation for marking, cutting, and engraving, as well as compatibility with various commercial design programs. It offers direct control over a wide range of features in the MAGIC™ product series through a clean and intuitive interface. With its user-friendly workflow, even complex jobs can be learned and executed easily and efficiently.

Versatile Toolpath Functions

A wide range of toolpaths can be created with simple operations and presets, including Scan Line, Hatching Line, Outline, Single Line, Photo Marking, Halftone Engraving, V-Carving, and Drilling. These allow users to leverage each MAGIC™ machine for a variety of applications.

Direct Control of MAGIC™ Machine Functions

The software is tightly integrated with the MAGIC™ series, enabling direct use of advanced features such as measurement tools, control settings, and camera systems, providing a seamless user experience.

File Compatibility with Commercial Software

MagicEngrave™ supports file compatibility with Illustrator, CorelDRAW, Photoshop, AutoCAD, and other commercial design software, allowing for easy integration into existing workflows.

Tool Library Management

Users can manage a comprehensive library of tools including end mills, V-cutters, scribing tools, dot pins, and lasers that making it easy to select the right tool when generating toolpaths.

Material-Specific Parameter Management

Material settings such as speed, depth, and power can be registered and managed based on the characteristics of each material such as gold, silver, copper, brass, aluminum, plastics, wood, and more, allowing quick and accurate parameter selection.

Editing Features

Text Input and Font Selection

Easily input and edit text, adjust fonts, sizes, and spacing.

Object Creation and Modification

Create and modify shapes like circles, rectangles, polygons, text boxes, and curved text layouts.

Position / Rotation / Scaling

Quickly adjust position, angle, and size of objects using mouse or keyboard controls.

Object Duplication

Use multi-copy functions to duplicate designs or toolpaths across rows, columns, or along paths for consistent and efficient layout.

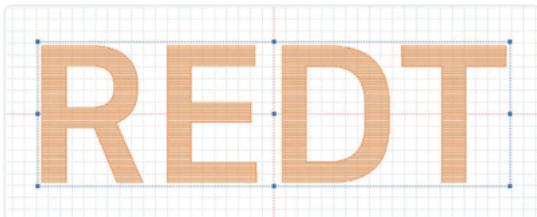

Layer and Snap Functions

Manage complex designs and toolpaths through layers, and place objects precisely using various snap options.

QR Code / Barcode / Fingerprint / Voice Waveform Generation

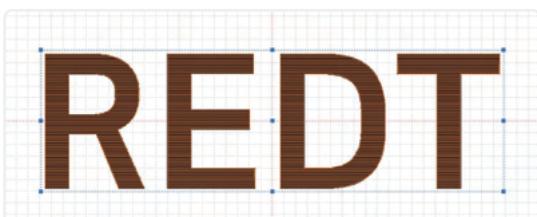

Easily generate QR codes, barcodes, fingerprints, and voice waveforms using input, scanner, or built-in microphone.

Toolpath Types

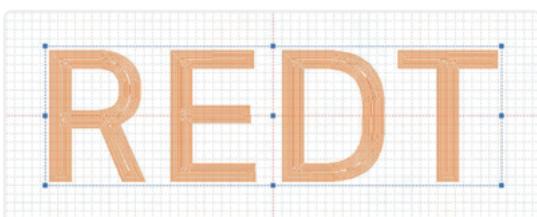

Scan Line

Generates evenly spaced horizontal or vertical lines to cover the entire design area.

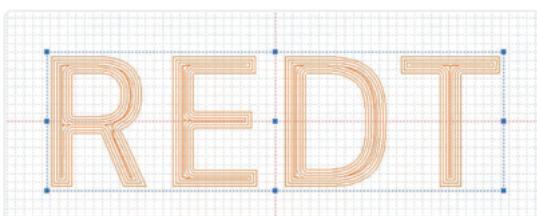

Hatching Line

Fills the interior of a design with the shortest possible horizontal or vertical lines.

Contour Line

Fills the interior of a design with evenly spaced boundary lines that follow the shape of the object.

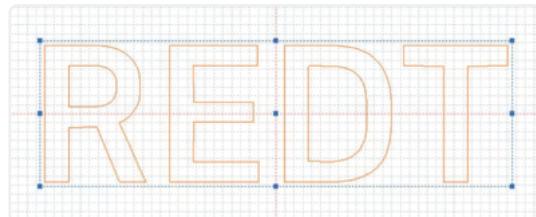

V-Carving

Uses the angle of the carving tool to create a 3D, dimensional engraving effect.

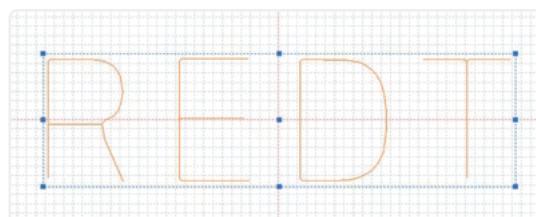

Lithophane

Converts photo grayscale into varying engraving depths to produce a backlit image effect.

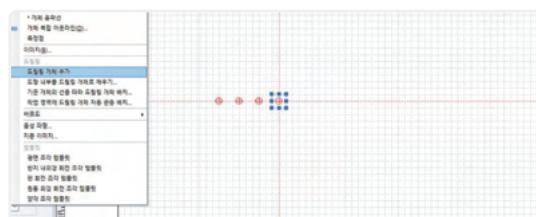

Outline

Creates lines along the outer boundary of the design.

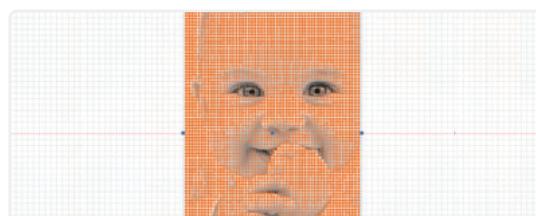

Single Line

Represents the design using single-line strokes.

Drilling

Creates holes in the material at defined depths and intervals.

Halftone

Reproduces photographic images as surface textures using engraving tools.

Photo Marking

Expresses photographic images using dot patterns.

Mobile Engraving Software

MAGIC™-Tablet

Supported Products

MAGIC™-E7,E4,E3,S7,S4,S3,5S,2S,1S

Applications

- Pendant Engraving
- Ring Engraving
- Pen Engraving
- other Engraving

Mobile Engraving App for MAGIC™ Series. This is a mobile engraving software designed for wireless use with MAGIC™ series products equipped with built-in Bluetooth. Featuring an intuitive interface, touch-based controls, and wireless machine operation, this app allows anyone to easily operate engraving machines and perform engraving tasks with simplicity and convenience.

A Sales Service That Combines Experience and Product

This service allows customers to actively participate in the engraving process, creating a more meaningful and personalized experience. The process is carried out as follows

- The customer selects a product to be engraved.
- Using a tablet, the staff guides the customer in choosing their preferred engraving style.
- The customer or staff enters the engraving text directly on the tablet screen via touch.
- The font, size, and position of the text are finalized in consultation with the customer.
- The engraving method is selected together with the customer.
- The engraving data is wirelessly transmitted via Bluetooth, and the engraving is performed.

Software Features

Touch-Based Mobile Software

Designed for tablets and smartphones, this touch-based mobile engraving software is easy to learn and simple to use, making it accessible for anyone.

A Solution for Customer Interaction

Let customers participate directly by selecting engraving text and designs themselves. This creates a more engaging purchasing experience and adds value through personalized service.

Wireless Device Control

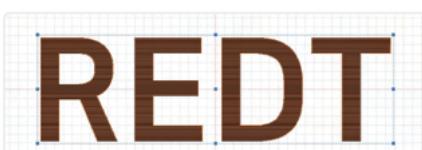

Using Bluetooth wireless communication, engraving data can be transferred without cables. The machine can be controlled without a computer, and even from a distance, offering a flexible and convenient working environment.

Easy to Learn, Easy to Use

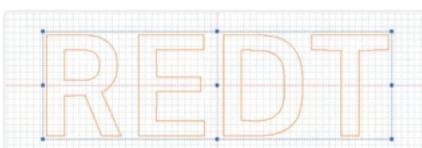

With a clean, intuitive interface focused on essential features, users can complete design and transmission tasks within just 5 minutes. The software is designed to be user-friendly for everyone.

Toolpath Types

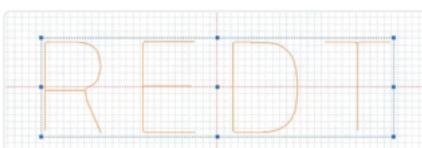

Hatching Line

Fills the interior of a design with horizontal or vertical lines using the shortest path possible.

Outline

Represents the outer boundary of a design with lines.

Single Line

Fills the interior of a design with horizontal or vertical lines using the shortest path possible.

Photo Engraving

Engraves photographic images using dot patterns.

Easy and fast key cutting and duplication
An essential app for professional locksmiths

CodeMaster4™ is a professional app designed for operating the MIRACLE™ key machine, offering professional locksmiths a range of features for efficient and user-friendly key cutting. The app enables professional locksmiths to cut and duplicate keys using an extensive collection of car, house, and special keys, while providing convenience features for seamless machine operation. This new version integrates the previous CodeMaster3 (Tablet/PC) and CodeMaster-M (Mobile) applications into a single, versatile app compatible with multiple platforms. It offers a consistent user interface with fast and reliable performance for various devices such as tablets, smartphones, PCs and laptops running Android, iOS or Windows.

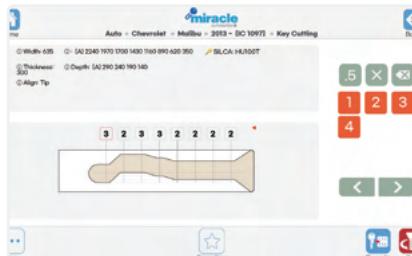

Advantages of the new CodeMaster4

- Enhanced Speed: Enjoy faster operations compared to the previous CodeMaster-M mobile app.
- Unified User Experience: Consistent UX and UI across all platforms, including Android, iOS, and Windows.
- Improved Wireless Communication: Faster, more stable connections with the Miracle key machine.
- Simplified Updates: Effortless application and data updates for a seamless experience.

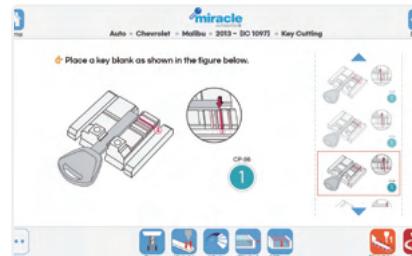

Software Features

An extensive key database covering car, motorbike, residential, and various specialized keys.

Simple and fast key cutting and duplication.

Easy creation and management of personal key data.

Favorites and history management for quick access to frequently used key data.

Key search function enables instant access to desired key profiles

Additional features for seamless operation of the MIRACLE™ key machine.
